**FUNCTIONAL REQUIREMENTS**

**May 18, 1999**

# **EXPERIENCINGLIFE.COM**

## **FUNCTIONAL REQUIREMENTS**

### **New Issues**

- Travel booking linkages??
- No phase II requirements, especially concierge, per hour charges
- Meeting planner
- Need to manage both registered and unregistered guests
- Business registration as a consideration for guests
- Customization/profile for home page view for guests
- Weather & directions links??
- Zip/postal code leader compensation component may include % of sponsorship fees in their zip/postal code
- Auto fax as an alternate to email for sponsor communication, at least initially
- Guest e-mail inquiry/queries with free response to find what guest is looking for, always suggest specialized membership subscriptions
- Link experience to catalog items
- Track zip/postal code leader rejection stats
- Track correspondent rejection stats with other stats
- Links to all major destination cities links are reciprocal with us
- Utility links for maps, weather, etc.
-

# EXPERIENCINGLIFE.COM

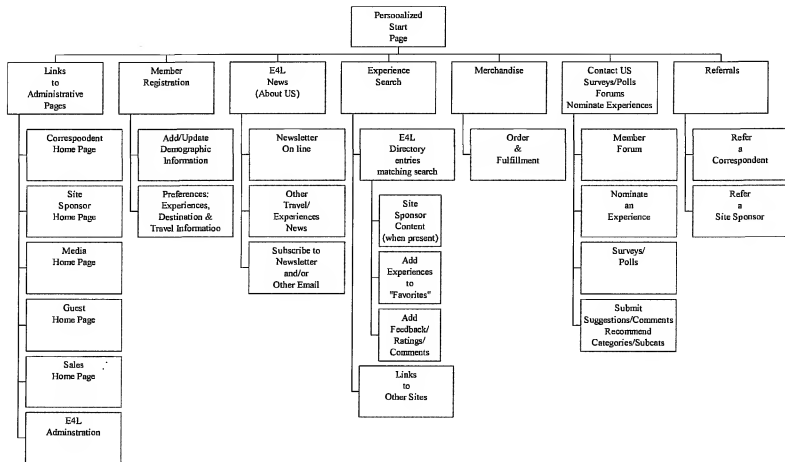

## FUNCTIONAL REQUIREMENTS

### OVERALL DESIGN REQUIREMENTS

1. E-Commerce
  - Merchandising/catalog software
  - Merchandising Icon to order “Merchandise” on each page
  - Accept credit cards
  - Ability to change credit card number
  - Accept I-checks
  - Security Icon (VeriSign?)
  - Link to clearing house (Cybercash?)
2. General Web and Graphic Design
  - Use Keywords and meta tags
  - User’s name pops up upon logging in
  - Auto bullet defaults on common choices (Male vs Female, etc.)
  - No “Error 404 pages” – replace with whatever is being used now – ongoing link tests for sites linked to E4L
  - Scrolling using PgDn vs just mouse
  - Ability to use “Enter” key vs using mouse for clicking
  - Signature File at bottom of Homepage w/goal statement
  - E4L Logo Home Button on each page
  - Statements
    - About Us
    - Disclaimer
    - Privacy Policy
    - Copyright Information
  - List # of sites per subcategory (i.e., 287 in fishing, 33 in cooking, etc.)
  - Add page numbers for results (i.e., page 1 of 6....)
3. Automatic Date/Time Capture for all activities
  - Zip Code/Leader Correspondent (s)
  - Category Correspondent
  - Volunteers
  - Site Sponsor
  - Guests (Site Sponsors and other)
  - General User
  - Media
  - Salesperson
  - Administration/Management
4. Automatic Generation of I.D. #'s (identifiable by user type)
  - Zip/Postal Code/Leader Correspondent(s)
  - Category Correspondent
  - Volunteers
  - Site Sponsor (consider multiples)
  - Guests (site sponsors and others)
  - General User
  - Media
  - Salesperson
  - Administration/Management
5. Email Servers
  - Various E4L departments (general user)
  - E4L – Correspondents (both ways)
  - E4L – Site Sponsors (both ways)
  - E4L – Salespersons (both ways)
  - E4L – Media (both ways)
  - E4L – Public (both ways)

# EXPERIENCINGLIFE.COM FUNCTIONAL REQUIREMENTS

## EXPERIENCINGLIFE.COM

# **EXPERIENCINGLIFE.COM**

## **FUNCTIONAL REQUIREMENTS**

### **EXPERIENCES 4 LIFE.COM**

1. Personalized start page
  - Start page is personalized based on defined travel destination/experience/travel information preferences
  - No id and password required, user id information retained as a cookie – What about travelers on the road wanting to get in with their profile?
2. Links to Administrative Pages (as a button on start page)
  - Correspondent
  - Site Sponsor
  - Media
  - Guest
  - Sales
  - E4L Admin
3. Member Registration
  - Add/update demographic information
    - Email confirmation of information and thank you
  - Add/update travel destination/experience/travel information preference profile
    - Email confirmation of information and thank you
  - Track member usage of E4L site
4. E4L News
  - View newsletter online
  - View other travel and experience related information
  - Subscribe to Newsletter and other email information (via “permission marketing” – ask if they would like to receive emails according to their interests (drop down menu by category) – database to filter accordingly).
    - Email confirmation of request and thank you
5. Experience Search
  - Search Functions
    - By keyword on homepage and sub-category pages
    - By Zip/postal Code
    - By Criteria choices on each page
      - Cost
      - Time
      - Location
      - Lifestyle
    - Short Description (comparison shopping)
    - Long Description (matrix)
    - Keep primary search to 3-5 drill downs
    - Text only capability (?)
    - Style and Hierarchy
      - Index as a directory (consider Excite’s search result functions)
      - Classification of Categories – 27 (3 columns, 9 in each column, alphabetically)
      - Major categories will have 3 sub-links under each
      - Ability to change or rotate sub-links as database grows
      - Ability to track frequency of sub-categories chosen
      - Possibly tab-over search function (Look Smart)
  - Search results display
    - Display in comparison format indicating which experiences have more detailed site sponsor created information
      - List # of searches results found @ top of page
      - View Site Sponsor information when present, information may also include a link to site sponsor or other home page
    - Add to “favorites” (user profile - not the same as a shopping cart)
    - Add feedback, comments & ratings to experiences
      - Email confirmation of receipt and thank you
    - Link to related affiliated partners when and where appropriate
6. Merchandise
  - Order and fulfillment (select items from catalog and pay via credit card or icheck)
  - Link to accounting system

## **EXPERIENCINGLIFE.COM**

### **FUNCTIONAL REQUIREMENTS**

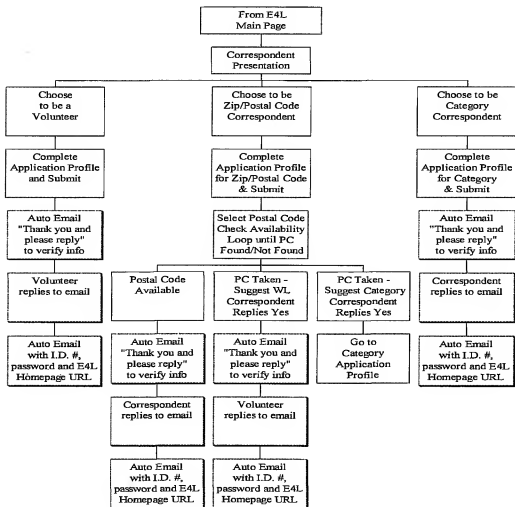

- Record purchases history for each user
  - Notice to fulfillment service
  - Auto email confirmation of order and charge to buyer
7. Communication & Feedback
- Member forum access
  - Ability to provide feedback to E4L
    - Submit suggestions and comments
    - Recommend sub-categories
    - Email thanking user for feedback
  - Surveys/Polls
    - Survey on value of E4L web site
  - Listserv generation of newsletter and other E4L news
8. Referrals
- Refer Correspondents
    - Email thanking user for nomination
  - Refer Site Sponsors
    - Email thanking user for nomination
  - Nominate sites
    - Email notice to appropriate zip/postal code leader and correspondent
    - Email thanking user for nomination

## FUNCTIONAL REQUIREMENTS

### E4L CORRESPONDENTS

#### New Correspondent Homepage

1. Access from E4L Main Home Page
  - Correspondent recruitment presentation
    - Correspondent Responsibilities (aka Correspondent @ Large/Category Specific)
    - Percentage Points and what they mean
    - FAQ's (described in detail under "Training")
    - User Agreement
    - Save User Agreement on server by I.D. #
    - Footnote that "they have no financial interest..."
    - Terms & Conditions
  - Select correspondent level (volunteer, zip/postal correspondent, category correspondent)
2. Volunteer
  - Complete and submit application profile
    - First Name, Middle Initial, Last Name
    - Address, City, State, Zip/postal Code, FAX #, Country, Country Code (consider APO's and FPO's)
    - Occupation (drop down)
    - Education
    - Household Income Level (drop down)
    - Social Security #
    - Industry Affiliation
    - Time in Area
    - Email Address
    - "How Did Your Hear About Us" (drop down)
    - Referred By... (name and I.D. #, points awarded to referring correspondent's account after referred person becomes a correspondent and other predetermined criteria have been met)
  - Send email thank you to volunteer requesting reply
  - Volunteer replies
  - Auto email response with instructions and permanent id and temporary password
  - Send email to zip/postal code leader
3. Zip/postal code correspondent
  - Complete and submit application profile including:
    - First Name, Middle Initial, Last Name
    - Address, City, State, Zip/postal Code, FAX #, Country, Country Code (consider APO's and FPO's)
    - Occupation (drop down)
    - Education
    - Household Income Level (drop down)
    - Social Security #
    - Industry Affiliation
    - Time in Area
    - Email Address
    - "How Did Your Hear About Us" (drop down)
    - Referred By... (name and I.D. #, points awarded to referring correspondent's account after referred person becomes a correspondent and other predetermined criteria have been met)
    - Desired zip/postal code and classification
  - Check zip/postal and classification availability, continue with this until zip/postal and classification found or alternatives are exhausted
  - Zip/Postal code and classification are available
    - Send email thank you to correspondent requesting reply
    - Correspondent replies
    - Auto email response with instructions and permanent id and temporary password
    - Send email to zip/postal code leader
  - Zip/Postal code and classification are not available
    - Give applicant option of becoming a volunteer
      - Send email thank you to volunteer requesting reply
      - Volunteer replies

# EXPERIENCINGLIFE.COM

## FUNCTIONAL REQUIREMENTS

- Auto email response with instructions and permanent id and temporary password
- Send email to zip/postal code leader
- Give applicant option of becoming a category correspondent
  - Go to category correspondent flow
- 4. Category Correspondent
  - Complete and submit application profile including:
    - First Name, Middle Initial, Last Name
    - Address, City, State, Zip/postal Code, FAX #, Country, Country Code (consider APO's and FPO's)
    - Occupation (drop down)
    - Education
    - Household Income Level (drop down)
    - Social Security #
    - Industry Affiliation
    - Time in Area
    - Email Address
    - "How Did Your Hear About Us" (drop down)
    - Referred By... (name and I.D. #, points awarded to referring correspondent's account after referred person becomes a correspondent and other predetermined criteria have been met)
    - Desired category (Correspondent will be able to choose from list of available categories)
  - Send email thank you to category correspondent requesting reply
  - category correspondent replies
  - Auto email response with instructions and permanent id and temporary password

### Correspondent Home Page

1. Login and password
  - On first login, require user
    - To set a permanent password
    - To "sign" Correspondent Agreement (with volunteer modifications)
    - Save Correspondent Agreement by I.D. #
    - Footnote that "they have no financial interest..."
  - On other logins allow password to be changed
  - Provide email request for a password to get it reset if password forgotten, reset will cause the first time dialog to appear for the creation of a permanent password
2. Home page contains
  - Personal and Company Profile
    - Make changes to "demographic" information
    - Make changes to personal preferences/profile
    - Confirmation and acceptance of changes immediately
    - Track function usage by each correspondent user
      - Specific web site functions used/accessed by specified measurement period
      - # of experiences submitted
      - # of Correspondent Referrals
      - # of Site Sponsor Referrals
      - Earned Points
        - Points for each site submission
        - Points for early registration
        - Points for correspondent referrals
        - Points for site sponsor referral
        - Points for site visitation (w/name and number of contact person – subject to verification)
        - Points for quality review of sites (feedback/rating)
        - Points for submitting a site that was "Category of the Month"
        - Points for submitting a site that was "vacant"
        - Points downgraded for poor submissions
  - Bonus Points for Zip/postal Code Leaders
  - Experience Submission
    - Nominate an Experience
      - Fill out all required data elements (as defined)
      - If address is needed – go to Yellow Pages or Map Quest on search engine

# EXPERIENCINGLIFE.COM

## FUNCTIONAL REQUIREMENTS

- For telephone numbers, use [www.mmiworld.com/telephone.htm](http://www.mmiworld.com/telephone.htm)
- For zip/postal code lookup, use [www.usps.gov/ncsc](http://www.usps.gov/ncsc)
- If email address is needed – use your search engine's email lookup function
- For Cost/Time fields – as these experiences are within your local zip/postal code, a quick phone call to the company would be your best solution.
- If Site is Seasonal or 1 Time experience, enter re-evaluation date.
- System generated email to appropriate zip/postal code correspondent, zip/postal leader or E4L
- Send a confirmation of acceptance/rejection of experience to correspondent
- Experience Maintenance
  - Experience search
    - Review/edit/update experiences
    - Site Sponsor status change request (to pending or hold) based on reviews and feedback or other factors
    - Directory entry removal request
  - Generate email to appropriate zip/postal code leader or E4L
- Experience Feedback
  - Experience Search
    - Add experience rating, feedback and/or comment
    - Email response with acceptance report with points, if any
- Ownership Program
  - Personal activity reports (points earned this period, life-to-date, etc.)
    - Track Number of Sites Submitted for each Correspondent
    - Track # of Correspondent Referrals
    - Track # of Site Sponsor Referrals
    - Track, total and break down individual percentage points
      - Points for each site submission
      - Points for early registration
      - Points for correspondent referrals
      - Points for site sponsor referral
      - Points for site visitation
      - Points for quality review of Sites (feedback/rating)
      - Points for submitting sites under "Category of the Month"
      - Points for submitting sites under "Vacant"
      - Bonus Points for Zip/postal Code/Category Leaders
      - Points downgraded for poor submissions
  - Filter Submissions by month and year
  - Track Feedback provided by each Correspondent (zip/postal code leader monitors)
  - Filter individual progress against other correspondents
  - Filter by different categories submitted with the # of each
  - Track Correspondent progress against E4L criteria ("Exception Reports")
- Recruitment and referral of correspondents, zip/postal leaders, site sponsors(Once correspondent or site sponsor comes online, points will be posted to referring person's account when/if other predetermined criteria have been met)
  - Ecard invitation to join E4L to friends, etc
- Check Zip/postal code waiting list
  - Request additional zip/postal codes
  - Email to zip/postal code leader
- Correspondent status change: apply for additional zip/postal codes, resign, etc.
- Leadership Program
  - Request to be leader/correspondent for additional zip/postal codes
    - To 'sign' Zip/postal code Leader Agreement
    - Save Zip/postal code Leader Agreement by I.D. #
    - Footnote that "they have no financial interest..."
    - Email response for confirmation or rejection
- Training
  - Correspondent Tutorial
  - Tutorial completion certificate email
- FAQ's (see detail)

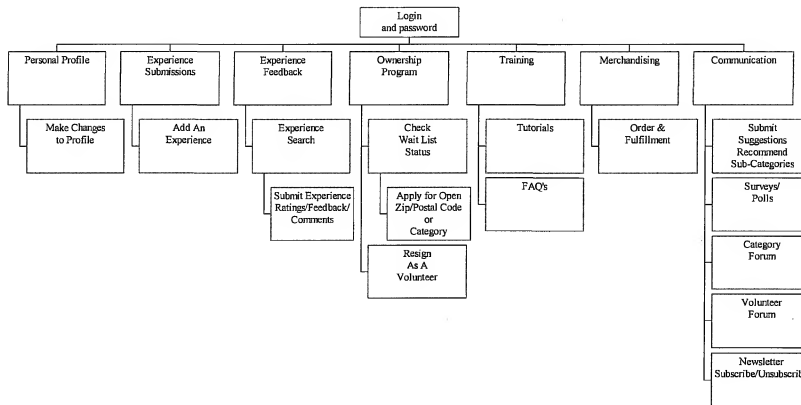

## **EXPERIENCINGLIFE.COM**

    - Email from E4L

**EXPERIENCINGLIFE.COM**  
**FUNCTIONAL REQUIREMENTS**  
**E4LZIP/POSTAL CODE LEADERS**

# EXPERIENCINGLIFE.COM

## FUNCTIONAL REQUIREMENTS

### E4LZIP/POSTAL CODE LEADERS

1. Only after approval received based on application after they have become a correspondent. Approved application will change status, not ID and Password
2. Login and password
  - On login allow password to be changed
  - Provide email request for a password to get it reset if password forgotten, reset will cause a first time dialog to appear for the creation of a permanent password
3. Home page contains
  - Personal and Company Profile
    - Make changes “demographic” information
    - Make changes to personal preferences/profile
    - Confirmation and acceptance of changes immediately
    - Track function usage by each user
  - Experience Management
    - Experience Search by all criteria
    - Report categories within zip/postal without experiences
    - Add/nominate an Experience
      - Generate email to appropriate zip/postal code correspondent, assuming a different correspondent is responsible for review/approval of the submission
      - Send a confirmation of acceptance/rejection of experience to zip/postal code leader, assuming a different correspondent is responsible for review/approval of the submission
    - Review and approve/reject all new correspondent experience submissions for the zip/postal code
      - On approval experience will be added at the next web site update
      - Auto email to correspondent with results of review, including changes in points earned, if any
    - Edit/review/update all experiences in assigned zip/postal code
      - Auto email to correspondent with results of review
    - Remove directly listings, on own or by request - experiences linked with site sponsors will require E4L approval
      - Auto email to correspondent confirming removal
      - Auto email to E4L requesting approval to remove an experience linked with a site sponsor
  - Site Sponsor Management
    - Site Sponsor search (filter by sip/postal code for which they are responsible)
    - Review/Approve/Reject Site Sponsor Submissions
      - On approval site will be added at the next web site update, rejected sites will be held/pending
      - Auto email to site sponsor with results of review
    - Request Site Sponsor to be placed on hold/pending, approval subject corporate agreement
      - Email site sponsor with notice of hold/pending status change request
  - Experience Feedback
    - Experience Search by all criteria
      - Submit ratings, feedback, comments for any experience
      - View experience ratings, feedback, comments for experiences within zip/postal code
      - Auto email to correspondents for experiences achieving high aggregate ratings (“high” is to be defined, as well as time period for measurement)
  - Ownership Program
    - Personal activity reports (points earned this period, life-to-date, etc.)
    - Zip/postal code status for openings, assignments, waiting lists
    - Recruitment and referral of correspondents, zip/postal leaders, site sponsors
      - Ecard invitation to join E4L
  - Leadership Program
    - Request to be leader/correspondent for additional zip/postal codes
    - Resign or request change in status, leader to correspondent, resign from a zip/postal code or resign completely
    - Correspondent activity reports
      - Auto email notice to correspondent of low activity level
  - Training
    - Zip/postal Leader Leadership Tutorial

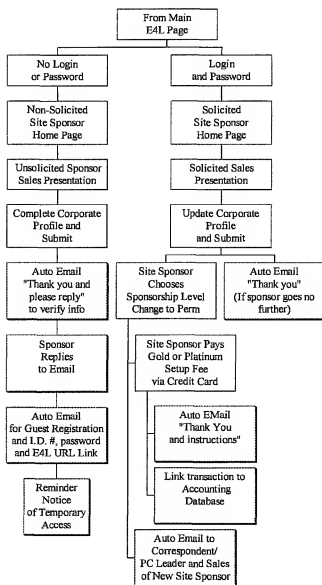

## **EXPERIENCINGLIFE.COM**

**E4L SITE SPONSORS**

# EXPERIENCINGLIFE.COM FUNCTIONAL REQUIREMENTS

## E4L SITE SPONSORS

# EXPERIENCINGLIFE.COM FUNCTIONAL REQUIREMENTS

## E4L SITE SPONSORS

### New Site Sponsor Homepage

1. Access from E4L Main Home Page
2. Invited Site Sponsor (Temporary login and password assigned previously as a result of an invitation)
  - "Home page"
  - Login and Password
    - Allow password to be changed
    - Provide email request for a password to get it reset if password forgotten, reset will cause the first time dialog to appear for the creation of a permanent password
  - Solicited sales presentation
  - Update corporate profile
  - Select sponsorship level and submit
    - Send email thank you to sponsor with content creation instructions and permanent id and temporary password
    - Send email to sales person
    - Send email to correspondent and zip/postal code leader
    - Link transaction to accounting system for sales # and future billing
3. Drop in site sponsor (No temporary login and password previously assigned)
  - "Home page"
  - Unsolicited sponsor sales presentation (probably more explanation about E4L)
  - Input corporate profile and submit
    - Generate email confirmation and request to respond
    - New Sponsor responds to confirmation and a email with temporary id and password, the id expiration date, and URL is returned. (Limited or no checking regarding sponsor to get a temporary id)
4. Temporary Site Sponsor Access as part of Guest Access program
  - Email alert 30-45 days to site sponsor prior to "guest expiration" to sell sponsorships
  - Email alert to respective salesperson notifying "guest expirations" of site sponsors for follow-up

### Site Sponsor Home Page

5. Login and password assigned after sponsor has chosen and paid for a sponsorship level
  - Allow password to be changed
  - Provide email request for a password to get it reset if password forgotten, reset will cause the first time dialog to appear for the creation of a permanent password
6. Home page accessed after login
  - Site Sponsor profile: name, address, contact name and information, Email address, Credit card, Change URL,
    - Confirmation and acceptance of changes immediately
    - Update preferences
    - Track function usage by each sponsor
  - Site Sponsor Submissions
    - Request for additional experiences
      - Email to correspondent, PCL or E4L for approval and cc copy to Sales
    - Request changes to E4L "free directory" listing (word usage/key words)
      - Email to correspondent, PCL or E4L for approval and cc copy to Sales
    - Acceptance/rejection email as needed with cc copy to Sales
    - Link to Become a Correspondent
  - Site Sponsor Maintenance
    - Create own site content via web page builder supplied by E4L
      - Email to correspondent, PCL or E4L for approval and cc copy to Sales
    - Edit/Review/Update site content
      - Email to correspondent, PCL or E4L for approval and cc copy to Sales
    - Acceptance/rejection emails to sponsor
  - Site Sponsor Feedback
    - Site Search with criteria by name, zip, city/state, sales region, sales person, category, sub-category or any combination of criteria (same as public search capabilities)
      - Access to feedback/ratings/comments of own site
      - Add feedback/ratings/comments as a general user would
  - Site Sponsorship Program
    - Activity Reports

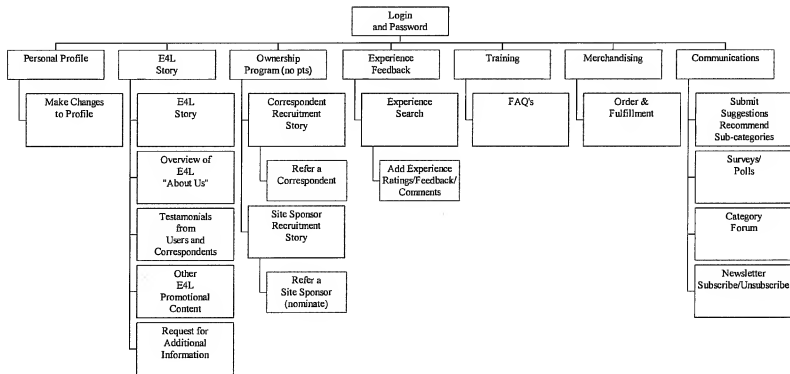

## EXPERIENCINGLIFE.COM

  - Traffic activity for Site Sponsor
  - Auto emails
    - Sponsor renewal notices
4. Media Administration
  - Site sponsor search
    - Media management
    - Media specific analysis reports
  - General Media analysis reports
  - Auto emails
5. Guest Administration
  - Guest search
    - Guest management
    - Specific Guest analysis reports
  - Guest analysis reports
  - Auto emails
6. Catalog Administration
  - Item Search
  - Item Management

# EXPERIENCINGLIFE.COM

## FUNCTIONAL REQUIREMENTS

- Item maintenance - Add/Change/Delete catalog entries
- Catalog sales analysis reports
  - Track # of Purchases Made
  - Track Gross Revenue from merchandise
  - Track sales tax
  - Reports of who purchased what
- 7. Content Administration
  - Experience Search
    - Experience management
      - Review and approve/reject content for zip/postal codes without correspondent or zip/postal code leader
      - Review and approve/reject deletions for experiences with site sponsors
  - Content publishing processes – move updates and new content from staging area to main web site
  - Reporting and analysis
    - Top 10 rated experiences
    - Which categories are getting the most hits – top 10, etc.
      - Major Category views
      - Sub-category views
    - Track number of sites submitted for each category and sub-category
    - Submissions activity by month and year
    - Zip/postal code analysis reports
      - Overall
      - By target population group
    - Cross check by experience ratio to population
  - Auto emails on experience changes to correspondents and zip/postal code leaders
- 8. Member Administration
  - Member search
    - Member management
    - Specific Member analysis reports
  - Overall Member reports
  - Auto emails
- 9. General Administration
  - Ecommerce
    - Statistical analysis reports regarding sales volumes, etc
  - Develop and maintain tutorials and FAQ's
  - Database Management and Clean up
    - Look for duplicates - multiple submissions are selected by priority time/date stamp
    - Look for dead links
    - Update new sub-categories as needed
    - Cross check for "empty" matches
    - Track when sites were last updated
  - Statistical Analysis
    - Number of unique and repeat visitors
      - Week/Month/Year
    - Activity Reporting
      - Search results (user puts in criteria – capture the unmatched)
      - Length of time per page
      - Length of time per visit
      - Length of time per category
    - Hits per day – page views
    - Hits per week– page views
    - Hits per month– page views by:
      - Members
        - Track domestic vs international
      - Correspondents
      - Site Sponsors
      - Guests

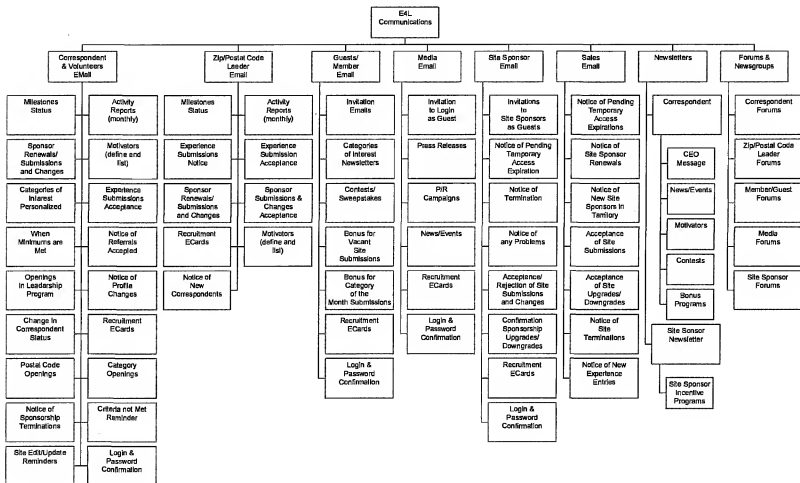

## **EXPERIENCINGLIFE.COM**

### **FUNCTIONAL REQUIREMENTS**

- Salespersons
- Corporate office
- Productivity Statistics
  - Number of Correspondents
  - Number of Site Sponsors
  - Percentage Point Breakdown
  - Criteria check (progress against goals)

# EXPERIENCINGLIFE.COM

## FUNCTIONAL REQUIREMENTS

# EXPERIENCINGLIFE.COM

## FUNCTIONAL REQUIREMENTS

### E4L COMMUNICATIONS

1. Correspondent Email
  - Automatically generated correspondent messages
    - "Vacant" sites in their zip/postal code/category
    - When a site submission is accepted showing their points earned
    - "Category of the month" alert
    - Acknowledgement when correspondent reaches minimum
    - Acknowledgement when correspondent reaches a milestone
    - Openings in leadership program by zip/postal code/category
    - Notice when a new Correspondent Joins E4L through his/her referral & points, if any
    - Notice when a Site Sponsor has Joined E4L through his/her referral & to check % activity
    - Reminder at re-evaluation time to edit experiences

## **Add Subject**

### **Process Summary:**

This process will be used to add a subject to the database. All subjects that are added to the database will be done through this process. This process includes the ability to look for subjects in the database that may be similar/identical to the subject about to be entered. The initial descriptive words as well as the rating of these words is established through this process. Activity through this process is tracked for possible reward mechanisms.

These webpages should be broken into two frames, the first frame 75% containing the data fields and the second screen 25% containing a field that contains help messages.

Data Fields
Help

### **Accessibility:**

This process will be accessible to the following roles:

Roles {1,2,3,4,5,7}

This process will be accessible from the home page/journal page of the above-specified roles.

## **Add Subject (Step 1)**

### **Functionality:**

This is the first page in the process of adding a subject. This page will serve one basic function, to determine if a subject exactly like or similar to the subject about to be added exists in the database. This will help to prevent duplication of content in the database.

The location from where this screen was called is passed in using the LOC parameter in the querystring. The value must be saved and used to the last screen to control screen flow.

LOC={Value representing where this process was called from}

If the subject to be added is a nomination, the following will be passed in via the querystring:

NOMID=99999

The value will be used on another screen to copy the data from the subject\_nominations table.

Unset the session variable (if any) that contains the subject\_id of the last subject added.

When the form is displayed, the following elements will be prepopulated:

The possible subject categories comboboxes will each contain a blank element (first one), and each of the XX available level 1 categories from the category\_domain table. The following SQL would be used:

**To populate the category drop downs:**

```
SELECT category_code, category_desc
FROM category_domain
WHERE site_id = :SITEID {session variable containing the current site id}
AND category_level = 1
```

**The country combobox:**

```
SELECT country_code, country_desc
FROM country_domain
WHERE site_id = :SITEID {session variable containing the current site id}
ORDER BY country_desc
```

**The state combobox:**

```
SELECT state
FROM postal_code_domain
WHERE site_id = :SITEID {session variable containing the current site id}
AND country_code = 1 (US)
```

This form would also contain link to 'Infospace' for the correspondent to look up information on a subject.

### **Database Tables Used:**

CATEGORY\_DOMAIN  
POSTAL\_CODE\_DOMAIN  
COUNTRY\_DOMAIN

### **Screen/Email/Report Prototype:**

SC100

**Validations:**

Verify that at least 1 field has been filled in section 1

Verify that at least 1 field in area 2 has been selected

## Add Subject (Step 2)

### Functionality:

This is a process that will perform a search of the subject database based on the information entered on the previous screen.(SC100)

The search would be constructed as follows: (It should be noted that based on the data entered on the form, the specific segments of the where clause would change).

```
SELECT DISTINCT s.subject_id, subject_desc,s.subject_essence,s.primary_category_desc,
                s.city,s.state,s.zipcode, s.region_desc, s.organization, s.country_desc
FROM      subjects s LEFT OUTER JOIN destinations d ON
          (s.site_id = d.site_id
           AND s.subject_id = d.subject_id)
WHERE     site_id = :SITEID {session variable containing the current site id}
AND       (s.city = :city
OR         s.nearest_city_1 = :city
OR         s.nearest_city_2 = :city
OR         s.nearest_city_3 = :city
OR         s.nearest_city_4 = :city
OR         s.nearest_city_5 = :city)
AND       (s.state = :state OR (d.destination_type = 'S' AND destination = :state))
AND       (s.country = :country OR (d.destination_type = 'C' AND destination = :country))
AND       s.zip_code = :zipcode
AND       (s.primary_category_code = :code1
OR         s.primary_category_code = :code2
OR         s.primary_category_code = :code3
OR         s.primary_category_code = :code4
OR         s.organization LIKE :name1%
OR         s.organization LIKE :name2%
OR         s.organization LIKE :name3%
OR         s.organization LIKE :name4%)
ORDER BY s.organization
```

### Database Tables Used:

SUBJECTS  
DESTINATIONS

### Screen/Email/Report Prototype:

N/A

### Validations:

N/A

## **Add Subject (Step 3)**

### **Functionality:**

This page will display the subjects that matched the selection criteria entered in step 1. If no records are found, the page will display with a message indicating such. Clicking on a selected subject will result in the 3<sup>rd</sup> page of the subject being displayed, just as if the search had been done from the search results page. The user will use this screen to determine if his/her subject has already been entered into the database. The following fields will be displayed in the list:

- Subjects.organization
- Subjects.subject\_id
- Subjects.subject\_desc
- Subjects.subject\_essence
- Subjects.primary\_category\_desc
- Subjects.city
- Subjects.state
- Subjects.zip
- Subjects.Country\_desc
- Subjects.Region\_desc

Two buttons will be available at the bottom of the screen, a button to continue on to the next step, an another button to go back and search again.

### **Database Tables Used:**

SUBJECTS

### **Screen/Email/Report Prototype:**

SC102

### **Validations:**

N/A

## **Add Subject (Step 4)**

### **Functionality:**

This webpage will be used to collect the basic information concerning a subject.

The major category combobox will be populated with all of the level 1 category codes.

```
SELECT category_code, category_desc
FROM category_domain
WHERE site_id = :SITEID {session variable containing the current site id}
AND category_level = 1
```

Populate the region combobox with the following

```
SELECT region_code, region_desc
FROM region_domain
WHERE site_id = :SITEID {session variable containing the current site id}
ORDER BY region_desc
```

Populate the country combobox with the following

```
SELECT country_code, country_desc
FROM country_domain
WHERE site_id = :SITEID {session variable containing the current site id}
ORDER BY country_desc
```

Populate the state combobox with the following statement

```
SELECT state
FROM postal_code_domain
WHERE site_id = :SITEID {session variable containing the current site id}
AND country_code = 1 (US)
```

This form would also contain link to 'Infospace' for the correspondent to look up information on a subject.

If the user clicks on the cruise/tour button, another form would be displayed to collect additional destinations. This page is described as step 15 & 16.

If a parameter NOMID was passed into the first screen then use that value to perform the following.

- SELECT the following fields from the subject\_nominations table that has the given ID and redisplay the screen with the data elements prepopulated.  
All fields in subject\_nominations should be copied over. This will take place on more than just this page.

### **Database Tables Used:**

SUBJECTS  
POSTAL\_CODE\_DOMAIN  
COUNTRY\_DOMAIN  
REGION\_DOMAIN  
CATEGORY\_DOMAIN  
SUBJECT\_NOMINATIONS

**Screen/Email/Report Prototype:**

SC103

**Validations:**

Verify that the following fields have been populated

- Experience description
- Experience essence
- Major category
- Organization Name
- City
- State
- If no zip code has been entered then
  - Country Code / Region {one or both}
- If country code = 1 {USA} then require postal code
- The personal subject question must be answered
- The qualification question must be answered

Verify that if the copy button is pressed that a subject ID has been placed into the text box.

## Add Subject (Step 5)

### Functionality:

This process will save the data to the database and set flags to control the flow of the pages. This process will create the initial record in the subjects table.

Check the following fields for banned words:

(This process would consist of comparing the words in the specified fields to a list of 'banned' or profane words that we do not want on our website.)

Brief description

Essence of subject

Special Instructions

If profanity is found, reject the page. Send an error screen and ask them to go back to correct.

Save the data from the page to the DB

```
//If the session variable that contains the subject id is empty then (the user is on this screen for the first time)
```

```
// Get the next available subject_id for this site
```

```
KEY_VALUE = :USERID + date and time
```

```
INSERT INTO { :SITEID }_next_subject_id (an example: 1_next_subject_id)  
VALUES (KEY_VALUE)
```

Determine the value of the identity column either by SELECTING from the table using the KEY\_VALUE that was generated or referencing the @@IDENTITY value after the insert.

DELETE the row created in this table.

```
INSERT INTO subjects
```

```
(site_id,subject_id,subject_desc,subject_essence,primary_category_code,primary_category_desc,

visible = 0,
region_code = :region_code,
region_desc = :region_desc,
WHERE site_id = :SITEID {session variable containing the current site id}
AND subject_id = :subject ID session variable

```

Check to see if any additional destinations were added to this subject. (from step 15)

If the session variable DESTINATIONS is not blank then get the additional destinations entered from the state table.

```

SELECT destination, destination_type
FROM add_subject_state
WHERE site_id = :SITEID {session variable containing the current site id}
AND tag = :DESTINATIONS

```

// For each row returned from the above query

```

INSERT INTO destinations VALUES (:SITEID, :subjectIDVar, :destination, :destination_type)

```

Create the search words

```

DELETE FROM subject_search
WHERE site_id = :SITEID {session variable containing the current site id}
AND subject_id = :SubjectIDVar

```

```

For each word in :subject_desc
INSERT INTO subject_search (site_id, subject_id, search_word)
VALUES (:SITEID, : SubjectIDVar, :search word)

```

```

For each word in :primary_category_desc
INSERT INTO subject_search (site_id, subject_id, search_word)
VALUES (:SITEID, : SubjectIDVar, :search word)

```

Create a cursor for:

```

SELECT Equivalent_word
FROM Level_1_Equivalency
WHERE site_id = :SITEID {session variable containing the current site id}
AND category_code = :primary_cat_code

```

For each row in the cursor do

```
INSERT INTO subject_search (site_id, subject_id, Equivalent_word)
VALUES (:SITEID, :subjectIDVar, :search word)
```

Set a session variable (CURRENTSUBJECTID) that contains the subject\_id. This can be used on subsequent screens as the key for all of the update/insert statements.

**Database Tables Used:**

SUBJECTS  
SUBJECT\_SEARCH

**Screen/Email/Report Prototype:**

N/A

**Validations:**

## **Add Subject (Step 6)**

### **Functionality:**

This webpage will contain two main sections. Section 1 will contain an example of how the directory listing would look for this submission, (see definition of Step 3, and use this format for this section).

The user can select the back button on the browser to make changes to the data contained in section 1

Section 2 will contain all of the descriptive words for the selected level 1 category code. The words should be represented as checkboxes. The following statement will get the necessary words:

```
SELECT descriptive_word
FROM   subject_desc_words_domain
WHERE  site_id = :SITEID {session variable containing the current site id}
AND    category_code = :subjects.primary_category_code
ORDER BY descriptive_word ASC
```

The Modify link will simple be a reference to back().

Select the minimum number of words required

```
SELECT add_min_real_words
      Add_min_words_selected
FROM   system_parameters
WHERE  site_id = :SITEID {session variable containing the current site id}
```

### **Database Tables Used:**

```
SUBJECTS
SUBJECT_DESCRPTIVE_WORD_DOMAIN
SYSTEM_PARAMETERS
```

### **Screen/Email/Report Prototype:**

SC104

### **Validations:**

Verify that at least {add\_min\_words\_selected} words have been selected.

Verify that at least { add\_min\_real\_words} of the selected words are real words.

## **Add Subject (Step 7)**

### **Functionality:**

This process will save the data from the previous screen to the DB.

```
DELETE FROM subject_desc_words
WHERE site_id = :SITEID {session variable containing the current site id}
AND subject_id = :subject_id
```

Find all words that have been checked and perform the following SQL statement for each:

```
INSERT INTO subject_desc_words
(site_id, subject_id, descriptive_word, category_code, descriptive_word_rating, rating_count)
VALUES(:SITEID, :subject_id, :word, :primary_category_code, 0.0, 0)
```

If any words are in the suggested words section, perform the following

Compare the words to the filter list

If word is ok then

```
SELECT count(*) FROM suggested_words
WHERE site_id = :SITEID {session variable containing the current site id}
AND suggested_word = :word
AND category_code = :primary_category_code
If count = 0 then
```

```
INSERT INTO suggested_words (site_id,
category_code, suggested_word, times_suggested)
VALUES(:SITEID, :primary_category_code, :word, 1)
```

Else

```
UPDATE suggested_words
SET times_suggested = times_suggested + 1
WHERE site_id = :SITEID {session variable containing the current site id}
AND category_code = :primary_category_code
AND suggested_word = :word
```

### **Database Tables Used:**

SUBJECT\_DESC\_WORDS  
SUGGESTED\_WORDS

### **Screen/Email/Report Prototype:**

N/A

### **Validations:**

N/A

## **Add Subject (Step 8)**

### **Functionality:**

This webpage is used to collect a refined description of the subject being submitted. The page will contain two sections. The first section will contain the words that the user selected from the previous page and a series 5 radio buttons next to the word to represent the importance of the word, the radio buttons will represent the following values for importance of the word:

(Extremely, Very, Important, Somewhat, Slight) the values associated are (5-1)

The user would rate each of the words by selecting the appropriate radio button for each word.

The following query can be used to retrieve the words:

```
SELECT descriptive_word
FROM subject_desc_words
WHERE site_id = :SITEID {session variable containing the current site id}
AND subject_id = :exp_id
ORDER BY descriptive_word
```

The second part of the page contains the remaining descriptive information that needs to be collected for the 'subjects' table.

The time unit combobox will be populated with the following:

(Minutes, Hours, Days, Weeks, Months)

Default 'ADDITIONAL INFORMATION' into the comment heading field and protect this field.

### **Database Tables Used:**

SUBJECT\_DESC\_WORDS

### **Screen/Email/Report Prototype:**

SCI05

### **Validations:**

Verify that one of the time options has been completed.

Validate that the dates entered if any are valid.

Verify that only one of the date options is selected.

Options 1, 2 & 3 for time are mutually exclusive

Verify that all words have been rated

If average cost or the time fields are entered then both to and from are required.

## Add Subject (Step 9)

### Functionality:

This process will save the data from the webpage to the database. Update the subjects table with the information from the webpage. The following SQL statement will perform the necessary action.

Determine what to do with the cost values that were entered

```
FreeVar := 0;
```

```
If the 'free' checkbox is checked then  
    FreeVar := 1;
```

Convert time units if applicable. The base unit in the Db for time is minutes.

```
If time_units = 'Hours' then  
    TimeVal = TimeVal * 60  
Else if time_units = 'Days' then  
    TimeVal = TimeVal * 60 * 24  
Else if time_units = 'Weeks' then  
    TimeVal = TimeVal * 60 * 24 * 7  
Else if time_units = 'Months' then  
    TimeVal = TimeVal * 60 * 24 * 30
```

Check Family oriented answer

```
If Family Oriented = Yes then  
    FamilyVar := 'Y'  
Else if Family Oriented = No then  
    FamilyVar = 'N'  
Else if Family Oriented = SomeWhat then  
    FamilyVar = 'S'  
Else  
    FamilyVar = NULL
```

Check the Available Time

```
If available anytime checkbox is checked then  
    AvailableAnytimeVar := 1  
Else  
    AvailableAnytimeVar := 0
```

Check the months

```
JanVar, FebVar, MarVar, ..... = 0  
If Jan checkbox is checked then  
    JanVar := 1  
If Feb checkbox is checked then  
    FebVar := 1  
If Mar checkbox is checked then  
    MarVar := 1
```

```
.  
.   
.
```

Determine if the subject is a one time subject.

If the date from or date to edit box has data, then the subject should be treated as a 1 time subject.

OneTimeVar := 1;

Set the appropriate month checkboxes based on the date range entered.

Save the data

```
UPDATE subjects
SET free = :freeVar,
    avg_cost_from = MinCostVar,
    Avg_cost_to = :MaxCostVar,
    Min_time_req = :MinTimeVar,
    Max_time_req = :MaxTimeVar,
    Family_oriented = :FamilyVar,
    Available_anytime = :AvailableAnytimeVar,
    Available_Jan = :JanVar,
    Available_Feb = :FebVar,
    Available_Mar = :MarVar,
    Available_Apr = :AprVar,
    Available_May = :MayVar,
    Available_Jun = :JunVar,
    Available_Jul = :JulVar,
    Available_Aug = :AugVar,
    Available_Sep = :SepVar,
    Available_Oct = :OctVar,
    Available_Nov = :NovVar,
    Available_Dec = :DecVar,
    Date_Subject_start = :SubStartDate,
    Date_Subject_end = :SubEndDate,
    One_time_experience = :OneTimeVar,
    Family_comment = :famComment,
    Availability_comment = :availcomment,
    Time_comment = :timecomment,
    Cost_comment = :CostComment
WHERE site_id = :SITEID {session variable containing the current site id}
AND subject_id = :sub_id
```

If text exists in the additional comments field, then

```
// Determine subject level and type of exposure
SELECT personal_experience,
    Qualification
FROM subjects
WHERE site_id = :SITEID {session variable containing the current site id}
AND subject_id = :exp_id;

INSERT INTO subject_comments (site_id, comment_id, subject_id, user_id, comments,
    contributor_comment,
    Comment_date, age_code, gender, headline, visible,
    Direct_exp, experience_level, times_viewed, times_agreed,
    User_type_desc )
VALUES (:SITEID, 0, :sub_id, :user_id, :comment text, 1, date(), :age_code, :gender,
```

'ADDITIONAL INFORMATION',1,:direct\_experience,:qualification,  
0,0,:USERTYPEDESC {session variable} )

Save the ratings:

```
DELETE FROM subject_ratings
WHERE site_id = :SITEID {session variable containing the current site id}
AND subject_id = :sub_id
```

**For each word that has been rated perform the following:**

```
{
// Get the weighting value for this role.
```

```
SELECT opinion_multiplier
FROM user_type_domain
WHERE site_id = :SITEID {session variable containing the current site id}
AND user_type_code = :utypecode
```

```
WEIGHTING_MULTIPLIER :=:opinion_multiplier;
```

```
// Insert the individual rating
INSERT INTO subject_opinions
(site_id, opinion_seq, subject_id, opinion_type, opinion_score, opinion_date,
descriptive_word, opinion_weight)
VALUES
(:SITEID, 0, :sub_id, 'D', {score 1-5}, Date(), :descriptive_word,
WEIGHTING_MULTIPLIER )
```

```
// Recalculate and store the new aggregate rating
SELECT SUM(RATING_SCORE *RATING_WEIGHT)/SUM(RATING_WEIGHT)
average_rating, COUNT(*) count_of_ratings
FROM subject_ratings
WHERE site_id = :SITEID {session variable containing the current site id}
AND subject_id = :sub_id
AND rating_type = 'D'
AND descriptive_word = :dword

UPDATE subject_desc_words
SET descriptive_word_rating = :average_rating,
Rating_count = :count_of_ratings
WHERE site_id = :SITEID {session variable containing the current site id}
AND subject_id = :sub_id
AND descriptive_word = :dword
```

## **Add Subject (Step 10)**

### **Functionality:**

This webpage is used to classify the subject into multiple categories. The user will use the menu control to select the different endpoints (categories) to classify the subject in. The category code, as well as the hierarchy will be presented in the lower portion of the screen. The user must click on the 'confirm' checkbox and press submit for the entries to be saved to the DB. When the page is displayed, it will contain placeholders for 10 category classifications.

Using the tree control, each time an endpoint is reached and clicked, the following would be performed.

1. Verify that the category code is not already in the list at the bottom of the screen.
2. Place the following field {category\_code.category\_hierarchy} under the 'classification' heading at the bottom of the form.
3. Check the corresponding checkbox next to the entry.

Up to 10 entries can be created.

### **Database Tables Used:**

N/A

### **Screen/Email/Report Prototype:**

SC106

### **Validations:**

Verify that at least 1 of the classifications is checked.

Verify that 1 of the placements is in the primary category.

## **Add Subject (Step 11)**

### **Functionality:**

This process will save all categories that have been confirmed on SC016.

For each checked category, perform the following.

```
DELETE FROM subject_category
WHERE site_id = :SITEID {session variable containing the current site id}
AND subject_id = :exp_id;
```

```
INSERT INTO subject_category
(site_id, subject_id, category_code)
VALUES
(:SITEID, :exp_id, category_code)
```

### **Database Tables Used:**

SUBJECT\_CATEGORY

### **Screen/Email/Report Prototype:**

N/A

### **Validations:**

N/A

## **Add Subject (Step 12)**

### **Functionality:**

This webpage will contain the 3<sup>rd</sup> page view of the subject (same as the detail page from the search screen). See 3<sup>rd</sup> page detail specifications.

The page will contain a checkbox to capture whether or not to place this subject in the sponsor notification queue. This should default to the 'checked' state. The checkbox will not appear if the current role of the individual is a sponsor.

The page will contain two buttons at the bottom, 'Approved' and 'Make Changes'.

### **Database Tables Used:**

N/A

### **Screen/Email/Report Prototype:**

SC107

### **Validations:**

N/A

## **Add Subject (Step 13)**

### **Functionality:**

This process will make the final database changes and send the user to the appropriate area based on the selection they made.

If the 'Accept' button was pressed, perform the following:

```
SELECT point_value, dollar_value, view_value
FROM accounting_actions
WHERE site_id = :SITEID {session variable containing the current site id}
AND user_type_code = :USER_ROLE
If the zip code of the experience is the same as the zip code of the correspondent then
    AND action_code = 'ADD_SUBJECT_IN'
Else
    AND action_code = 'ADD_SUBJECT_OUT'

NUM_VIEWS_EARNED := NUM_VIEWS_EARNED + :view_value

INSERT INTO correspondent_audit
(site_id, user_id, action_date, action_code, points, posted_by, reference, dollar_value)
VALUES (:SITEID, :USER_ID, date(), 'ADD_SUBJECT', :point_value, 'SYS', :sub_id,
:dollar_value)

// Give points to others in the zip code where the experience was added, if the person that added the
experience is not from that zipcode
```

```
SELECT user_id
FROM system_users
WHERE site_id = :SITEID {session variable containing the current site id}
AND user_postal_code = {postal code of the experience}
AND user_type_code in (1,2)
```

Loop through all rows returned issuing the point allocation statements from above with the action code of ADD\_SUBJECT\_OVERRIDE

```
UPDATE subjects
SET add_completed = 1
  Notify_org = {0 if checkbox is not checked, 1 otherwise}
  Reserve_type = NULL,
  Date_reserved = NULL,
  Reserved_by = NULL
WHERE site_id = :SITEID {session variable containing the current site id}
AND subject_id = :sub_id

INSERT INTO review_queue
(site_id, review_id, subject_id, reason_for_review, national_pool,
date_review_requested, submitted_by)
VALUES
(:SITEID, :USERID+Date+Time,:exp_id, "NEW", 0, Date(), :USERID)
```

If the 'Accept w/changes' button is pressed, perform the following:

Take the user to the add/maintenance pages and preload the screens with the information from this subject.

**Database Tables Used:**

## **Add Subject (Step 14)**

### **Functionality:**

Go to the New Experience Maintenance Pages (WOMP120)

### **Database Tables Used:**

N/A

### **Screen/Email/Report Prototype:**

N/A

### **Validations:**

N/A

## **Add Subject (Step 15)**

### **Functionality:**

This webpage will be used to collect additional cities and countries for tours and cruises. The webpage will contain two radio buttons one of which must be selected to identify the type of values being entered. A tag will be passed to this servlet that will consist of the userid + time (hhmmss), this tag will be used to save the data entered into add\_subject\_state table

Perform the following upon creation of the screen to see if the user was here before

// If DESTINATIONS environment variable is set then

```
SELECT destination,
       Destination_type
FROM add_subject_state
WHERE site_id = :SITEID {session variable containing the current site id}
AND tag = :DESTINATIONS
```

```
If destination_type = 'C' then
    Radio button country will be selected
else
    Radio button state will be selected
Else
    No radio buttons will be selected
```

### **Database Tables Used:**

ADD\_SUBJECT\_STATE

### **Screen/Email/Report Prototype:**

SC109

### **Validations:**

Verify that one radio button has been selected, for each entry.

## **Add Subject (Step 16)**

### **Functionality:**

This process will save the data entered on the screen to the appropriate application state table.

If no words exists simply go back()

```
// If DESTINATIONS environment variable is set then
```

```
DELETE FROM subject_add_state  
WHERE site_id = :SITEID {session variable containing the current site id}  
AND tag = :DESTINATIONS
```

```
// Else
```

```
// Set session variable for state control  
DESTINATIONS = :USERID + Date + Time
```

For each word in the list:

```
INSERT INTO subject_add_state  
  (site_id, tag, destination, destination_type)  
VALUES  
  (:SITEID, :tag passed in, destination entered in field, {either S = state or C = Country})
```

### **Database Tables Used:**

SUBJECTS\_ADD\_STATE

### **Screen/Email/Report Prototype:**

N/A

### **Validations:**

N/A

## **Add Subject (Step 17)**

### **Functionality:**

This page will contain a message thanking the user for entering an experience into the system, it may also explain the validation process the experience must go through before being visible. The page will contain one or more links to other areas of the system.

### **Database Tables Used:**

N/A

### **Screen/Email/Report Prototype:**

SC108

### **Validations:**

N/A

## Add Experience

### **Process Summary:**

This process will be used to add an experience to the database. All experiences that are added to the database will be done through this process. This process includes the ability to look for experiences in the database that may be similar/identical to the experience about to be entered. The initial descriptive words as well as the rating of these words is established through this process. Activity through this process is tracked for possible reward mechanisms.

### **Accessibility:**

This process will be accessible to the following roles:

AC  
ZCL  
VC  
CC  
CAL

This process will be accessible from the home page/journal page of the above-specified roles.

### **Related Batch Processes:**

- |               |  |
|---------------|--|
| <b>BA004:</b> | The system must delete all experiences that are 1-time experiences and where the date for the experience has passed.   |
| <b>BA005:</b> | The system must consolidate all entries for the specified month from the experience_views table into the experience_views_summary table.   |
| <b>BA007:</b> | The system must note any site sponsor link that does not respond.  |
| <b>BA010:</b> | The system must delete all experiences where the add_complete flag is false. These are experiences that were created by the 'add experience' process, but never completed. A two day grace period has been added to deal with the situation where an experience add is started at 11:59pm (just before the date changes). All associated experience tables will be updated when an experience is deleted |
| <b>BA012:</b> | The system must mark all experiences for review/removal that have an average rating (the top 5 descriptive words) that is below a given threshold. The experience must be rated at least 10 times before it becomes subject to this rule.  |
| <b>BA014:</b> | The system must delete entries from the temporary tables used to retain state in the application. The entries in the tables must be removed if they are more than 1 day old.   |

## Overall Site Architecture

### **Database Server Specifics**

The database server will have the following minimum hardware requirements:

- Pentium III 500Mhz or greater processor.
- 256 Meg of Memory
- 8 Gig Available Disk Space

The database server software requirements:

- Windows NT 4.0 Service Pack 6
- Microsoft SQL Server 7.0 Service Pack 1

## Web Server Specifics

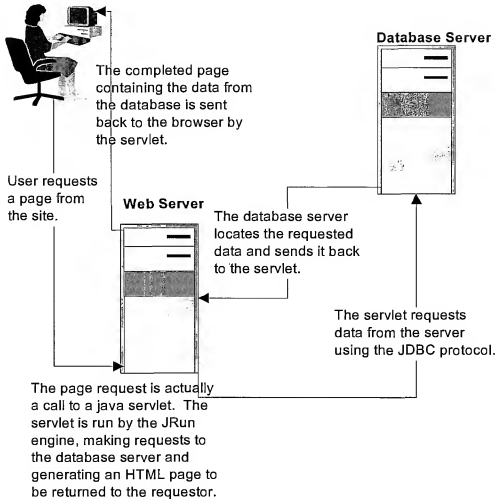

The web server will have the following minimum hardware requirements:

- Pentium III 500Mhz or greater processor.
- 256 Meg of Memory
- 1 Gig Available Disk Space

The web server software requirements:

- Windows NT 4.0 Service Pack 5
- Microsoft Internet Information Server 4.0
- Java Virtual Machine (JDK 1.2 Compliant)
- JRun 2.3 Servlet Engine
- Microsoft SQL Server 7.0 Client Software

## Overview of a Transaction

## **Batch Processing**

A backend batch process that will run on the DB server will perform a series of site maintenance and database maintenance functions. This processing engine will be written in C++ and will operate against the Microsoft SQL Server database. The purpose of this engine will be to run the daily, weekly and monthly maintenance process that allow automated administration of the website. Examples of some of the functions that the process would complete are:

- Remove subjects from the database that were left in an incomplete state.
- Locate subjects in the DB that are below a rating threshold and mark them for deletion at a future date an time.
- Delete subjects in the database that are marked to be deleted on that given date.
- Award bonus points to users on a given interval.
- Aggregate/archive data from table and clear out the old information.

Once the batch process has been configured, it will require little/no human intervention.

Gepetto Processes			
Process Name	Title	Description	Frequency
BA001	AC Invitation	Checks open AC positions, invites VC/CAL	Daily
BA002	LC Apply Invitation	Checks open LC positions, invites AC to apply	On-Demand
BA003	LC Invitation	Checks open LC positions, invites AC	On-Demand
BA004	Invite Cleanup	Removes expired invitations	Daily
BA005	User Purge	Removes users whose accounts have been inactive for longer than the specified limit	Daily
BA006	Contributor Goals	Evaluates contributor's performance for month against specified goals. Awards points for achieving goals, denotes poor performances and sends email	Monthly
BA007	Demotion	Evaluates performance based upon consecutive months of poor performance, demoting those who have not met expectations for specified number of months	Monthly
BA008	Old Experience Purge	Deletes one-time experiences whose experience date is more than the specified days past	Daily
BA009	Poor Experience Purge	Evaluates average word ratings for given experience, marking for deletion those who have received poor ratings for a specified number of consecutive months	Monthly
BA010	Experience View Summary	Summarizes views for given period, archiving the records	Weekly
BA011	Batch Reporting	Summarizes results of batch process run in the given period and emails the results to specified people	Daily
BA012	Link validation	System check for broken links	Daily
BA013	Ratings Purge	Removes ratings that are more than specified time old and recalculates averages	Monthly
BA014	Remove Incomplete Experiences	Removes any new experiences which were started by the add process was not completed within the specified period.	Daily
BA015	LC area progress report	Emails LC's w/ link to their area's monthly progress report	Monthly
BA016	Sponsor Payment Notification	Flags sponsored experiences as paid/not paid with results of payment process	Monthly
BA017	State Table Cleanup	Removes any state table entries which are over 24 hours old.	Daily
BA018	Top Words Update	Calculates the top x words in each given category	Monthly
BA019	Average Accounting Points	Calculates the average number of points, dollars, and views received by a user for each accounting action	Monthly
BA020	Bookmark Summary	Summarizes user bookmarks by week	Weekly
BA021	Top 100 Experiences	Creates the Top 100 experiences list for a given month, year, and category	Monthly

BA022	Top 100 Best of Best	Creates the Top 100 Best of Best experiences list	Monthly
BA023	Monthly Awards	Awards bonuses to Top Contributors, Guests, and Leaders	Monthly
BA024	Team Goals	Awards bonuses for teams meeting monthly team goal	Monthly
BA025	Contributor Reports	Generates Contributor emails w/ reports on Lives Touched, Experiences accepted, awards, etc over a given time period	Weekly
BA026	Guest Reports	Generates Guest emails w/ reports on lives touched, nominations accepted etc over a given time period	Weekly
BA027	Sponsor Reports	Generates Sponsor reports concerning views etc over a given time period	Weekly
BA028	Contributor Recruitment Bonuses	Awards bonuses to users who have referred someone as a contributor	Daily
BA029	Email Verifications	Used to track bounced emails (yet to be defined what consequences are taken for invalid addresses)	Daily
BA030	New User Welcome	Welcome emails sent to new users	Daily
BA031	Total Points Update	Updates the total points allocated per role.	Daily
BA032	Cash Updates	Updates the total cash bucket with the amount metered in for the month, figures total points for each user as of last transaction period, figures total points in each role's pool	Monthly
BA033	Monthly Goal Setting	Creates a monthly goal record for every contributor	Monthly

## Batch Requirements

NOTE: All batch processes will write the results of their actions into a table called "batch\_process\_results". The status of the batch process will also be written into this table (Success or Failure). This table will be reviewed on a daily basis as well as having an email generated from it to the sys admin.

### BA001.

**Description:** The system must mark for purging, users that do not respond to the validation email with a specified amount of days. The system will mark the record for removal to give time for manual intervention before the record is physically removed.

**Frequency:** Daily

**Parameters:** None

**Pseudocode:** Create a cursor for the following statement:

```
// Get the number of grace days to wait for a user to verify his/her email address
SELECT nbr_days_wait_corr_conf
FROM system_parameters

// Locate all records that have not been verified in the specified timeframe use a cursor
// for this operation (date to compare to will need to be calculated)
SELECT user_id , first_name, last_name,email_address,phone_number
FROM system_users
WHERE date_submitted < (DATE - nbr_days_wait_corr_conf)
AND (date_validated IS NULL OR date_validated = "")
AND (date_to_purge IS NULL OR date_to_purge = "")

INSERT INTO batch_process_master (batch_process_id,date_batch_start,batch_status)
VALUES ("U_MARK_PURGE",DATE,NULL)
// Set sequence number value to zero
seq_number = 0
For each record in the cursor do the following
    UPDATE system_users SET date_to_purge = DATE
    WHERE user_id = cursor_record.user_id
    Report_Line := User_id, first_name, ...
    INSERT INTO BATCH_PROCESSING_RESULTS
        (BATCH_PROCESSING_ID,BATCH_DATE,SEQ_NBR,
        BATCH_DETAIL_LINE)
    VALUES ("U_MARK_PURGE",DATE,seq_number,Report_Line)
    seq_number := seq_number + 1
End for loop

// Save process status to the batch_process_master table

INSERT INTO batch_process_master (batch_process_id,date_batch_end,batch_status)
VALUES ("U_MARK_PURGE",DATE,{success or failed})
```

## BA002.

**Description:** The system must remove (delete) users and their associated entries in child tables from the database when the purge flag is set and a predetermined amount of days have passed.

**Frequency:** Daily

**Parameters:** None

**Pseudocode:** Create a cursor for the following statement:

```
// Locate all records that are marked for deletion
// for this operation (date to compare to will need to be calculated)
SELECT user_id, first_name, last_name, email_address, phone_number
FROM system_users
WHERE date_to_purge IS NOT NULL
AND date_to_purge + 2 > DATE

INSERT INTO batch_process_master (batch_process_id, date_batch_start, batch_status)
VALUES ("U_PURGE", DATE, NULL)
// Set sequence number value to zero
seq_number = 0
For each record in the cursor do the following
    UPDATE system_users SET purge_record = "Y"
    Report_Line := User_id, first_name, ...
    INSERT INTO BATCH_PROCESSING_RESULTS
        (BATCH_PROCESSING_ID, BATCH_DATE, SEQ_NBR,
        BATCH_DETAIL_LINE)
    VALUES("U_PURGE", DATE, seq_number, Report_Line)
    seq_number := seq_number + 1
End for loop

// Save process status to the batch_process_master table

INSERT INTO batch_process_master (batch_process_id, date_batch_end, batch_status)
VALUES ("U_PURGE", DATE, {success or failed})
```

### BA003.

**Description:** The system must locate all correspondents that have not met their point quota for the given month. Correspondents will not be subject to these criteria during their 1<sup>st</sup> month of membership. The point quota is actually the point requirement for the role times the performance threshold percent. An email will be sent to all correspondents who do not meet the necessary threshold. All correspondents that have met their full goal will receive the designated bonus points

**Frequency:** Monthly

**Parameters:** Start Date and End Date

**Pseudocode:**

```
// Record beginning of batch process
INSERT INTO batch_process_master (batch_process_id,date_batch_start,batch_status)
VALUES ("POINT_QUOTA",DATE,NULL)

// Locate all users that are correspondents and have had no submissions for the given
// month
SELECT user_id , first_name, last_name, email_address, phone_number, user_type
FROM system_users
WHERE user_type_code in ( "CC", "ZCL","AC")
AND MONTHS_BETWEEN(SYSDATE,date_validated) >1

// Get the amount of points necessary for each role
SELECT (ac_period_quota*performance_threshold_percent) ac_quota,
       (cc_period_quota*performance_threshold_percent) cc_quota,
       (zcl_period_quota*performance_threshold_percent) zcl_quota
FROM system_parameters

// Set sequence number value to zero
seq_number = 0
For each record in the cursor do the following
    SELECT sum(points) correspondent_points
    FROM correspondent_audit
    WHERE user_id = :uid

    If user_type = "CC" then
        ValueToCompare = cc_quota
    Else if user_type = "AC" then
        ValueToCompare = ac_quota
    Else if user_type = "ZCL" then
        ValueToCompare = zcl_quota

    If correspondent_points < ValueToCompare then
        UPDATE system_users
        SET delinquent_stage = delinquent_stage + 1
        WHERE user_id = :user_id

    Report_Line := User_id, first_name, ...
    INSERT INTO BATCH_PROCESSING_ID,BATCH_DATE,SEQ_NBR,
            (BATCH_PROCESSING_ID,BATCH_DATE,SEQ_NBR,
             BATCH_DETAIL_LINE)
    VALUES("POINT_QUOTA",DATE,seq_number,Report_Line)
    seq_number := seq_number + 1
```

End for loop

// Save process status to the batch\_process\_master table

```
INSERT INTO batch_process_master (batch_process_id,date_batch_end,batch_status)
VALUES ("POINT_QUOTA",DATE,{success or failed})
```

#### BA004.

**Description:** The system must delete all experiences that are 1-time experiences and where the date for the experience has passed.

**Frequency:** Daily

**Parameters:** None

**Pseudocode:**

```
SELECT EXP_1_TIME_DELETE_GRACE_DAYS Grace_Days
FROM system_parameters

// Locate all records that are 1 time experiences and the end date for the experience has
// passed

Create a cursor for the following statement:
SELECT experience_id
FROM experiences
WHERE one_time_experience is = "Y"
AND date_experience_ends + : Grace_Days < DATE

INSERT INTO batch_process_master (batch_process_id,date_batch_start,batch_status)
VALUES ("EXPIRED_EXP",DATE,NULL)
// Set sequence number value to zero
seq_number = 0
For each record in the cursor do the following
    DELETE FROM experience_category WHERE experience_id = :exp_id
    DELETE FROM experience_views WHERE experience_id = :exp_id
    DELETE FROM experience_desc_words WHERE experience_id = :exp_id
    DELETE FROM experience_ad_comments WHERE experience_id = :exp_id
    DELETE FROM experience_search WHERE experience_id = :exp_id
    DELETE FROM experience_desc_words WHERE experience_id = :exp_id
    DELETE FROM experiences WHERE experience_id = :exp_id
    Report_Line := "Experience ID " + :exp_Id + " has been removed"
    INSERT INTO batch_processing_detail
        (BATCH_PROCESSING_ID,BATCH_DATE,SEQ_NBR,
        BATCH_DETAIL_LINE)
    VALUES("EXPIRED_EXP",DATE,seq_number,Report_Line)
    seq_number := seq_number + 1
End for loop

// Save process status to the batch_process_master table

INSERT INTO batch_process_master (batch_process_id,date_batch_end,batch_status)
VALUES ("EXPIRED_EXP",DATE,{success or failed})
```

## BA005.

**Description:** The system must consolidate all entries for the specified month from the experience\_views table into the experience\_views\_summary table.

**Frequency:** Weekly

**Parameters:** None

**Pseudocode:** Create the following cursor:

```
INSERT INTO batch_process_master (batch_process_id,date_batch_start,batch_status)
VALUES ("VIEW_SUMMARY",DATE,NULL)
```

```
SELECT experience_id, count(*)
FROM experience_views
WHERE MONTH(view_date) = :passed in month value
AND YEAR(view_date) = :passed in year
GROUP BY experience_id
```

For each record in the cursor do the following

```
INSERT INTO experience_views_summary VALUES(:exp_id, month,year
Count)
```

```
DELETE FROM experience_views WHERE experience_id = :exp_id
End for loop
```

// Save process status to the batch\_process\_master table

```
INSERT INTO batch_process_master (batch_process_id,date_batch_end,batch_status)
VALUES ("VIEW_SUMMARY",DATE,{success or failed})
```

## BA006.

**Description:** The system must email the system administrator the results of the batch processes that have been run the night before.

**Frequency:** Daily

**Parameters:** Date

**Pseudocode:** INSERT INTO batch\_process\_master (batch\_process\_id,date\_batch\_start,batch\_status)  
VALUES ("EMAIL\_PROC\_STATUS",DATE,NULL)

```
// Create the following cursor
SELECT *
FROM batch_processing_master
WHERE batch_start_date = :passed in date
ORDER BY batch_start_date
```

For each record in the cursor do the following

    Create a string of text containing all of the data from the select statement formatted

    In columns separated by a CRLF. Append all strings together

End for loop

```
// Save process status to the batch_process_master table
```

Place and entry into the email table with the above created information.

```
INSERT INTO batch_process_master (batch_process_id,date_batch_end,batch_status)
VALUES ("EMAIL_PROC_STATUS",DATE,{success or failed})
```

## BA007.

**Description:** The system must note any site sponsor link that does not respond.

**Frequency:** Daily

**Parameters:** None

**Pseudocode:** INSERT INTO batch\_process\_master (batch\_process\_id,date\_batch\_start,batch\_status)  
VALUES ("BAD\_LINKS",DATE,NULL)

// Create the following cursor

SELECT user\_id,first\_name,last\_name,email\_address,telephone\_number,url\_name  
FROM system\_users

WHERE url\_name IS NOT NULL and url\_name <> ""

Seq\_number := 0

For each record in the cursor do the following

    // Chek for a live url

    if url\_name is not responding then

        INSERT INTO batch\_processing\_detail

            (BATCH\_PROCESSING\_ID,BATCH\_DATE,SEQ\_NBR,

            BATCH\_DETAIL\_LINE)

        VALUES("BAD\_LINKS",DATE,seq\_number,Report\_Line)

        seq\_number := seq\_number + 1

End for loop

// Save process status to the batch\_process\_master table

INSERT INTO batch\_process\_master (batch\_process\_id,date\_batch\_end,batch\_status)

VALUES ("BAD\_LINKS",DATE,{success or failed})

## BA008.

**Description:** The system must demote any ZCL, AC, or CC correspondent who has been delinquent in their point duties three times or more to a VC. All other that have met their quota that have < 3 delinquencies will be reset back to a zero delinquent count.

**Frequency:** Quarterly

**Parameters:** None

**Pseudocode:** INSERT INTO batch\_process\_master (batch\_process\_id,date\_batch\_start,batch\_status)  
VALUES ("DEMOTE",DATE,NULL)

```
// Create the following cursor
SELECT user_id,first_name,last_name,email_address,telephone_number,url_name
FROM system_users
WHERE delinquent_stage >= 3
```

```
Seq_number := 0
For each record in the cursor do the following
    UPDATE system_users
    SET user_type_code = 'VC'
    WHERE user_id = :user_id
```

```
Report_Line := 'User name, id, etc.'
```

```
INSERT INTO batch_processing_detail
(BATCH_PROCESSING_ID,BATCH_DATE,SEQ_NBR,
 BATCH_DETAIL_LINE)
VALUES("DEMOTE",DATE,seq_number,Report_Line)
seq_number := seq_number + 1
End for loop
```

```
// Save process status to the batch_process_master table
INSERT INTO batch_process_master (batch_process_id,date_batch_end,batch_status)
VALUES ("DEMOTE",DATE,{success or failed})
```

## BA009.

**Description:** The system must remove all ratings on descriptive words that are more than XX months old. The exact value will be a parameter. Once the old ratings have been removed from the ratings table, the average rating for all words in all experiences must be recalculated.

**Frequency:** Monthly

**Parameters:** None

**Pseudocode:** INSERT INTO batch\_process\_master (batch\_process\_id,date\_batch\_start,batch\_status)  
VALUES ("UPDATE\_RATINGS",DATE,NULL)

```
// Get rid of the old ratings
DELETE FROM experience_ratings
WHERE rating_date < Date() - XX months

// Create the following cursor
SELECT exp_id
FROM experiences

// For each record in the cursor above perform the following
SELECT AVG(rating_score) AVERAGE_SCORE, COUNT(rating_score)
TOTAL_RATING
FROM experience_ratings
WHERE experience_id = :exp_id
AND rating_type = 'B'

UPDATE experiences
SET best_of_best_percentage = AVERAGE_SCORE
WHERE experience_id = :exp_id

// Create the following cursor
SELECT experience_id, descriptive_word
FROM experience_desc_words

For each record in the cursor do the following

SELECT SUM(RATING_SCORE *
RATING_WEIGHT)/SUM(RATING_WEIGHT) AverageRating,
COUNT(*) RatingCount
FROM experience_ratings
WHERE experience_id = :exp_id
AND rating_type = 'D'
AND descriptive_word = :dword

UPDATE experience_desc_words
SET rating_count = :RatingCount,
Descriptive_word_rating = :AverageRating
WHERE experience_id = :expID
AND descriptive_word = :dword

End for loop

// Save process status to the batch_process_master table
```

```
INSERT INTO batch_process_master (batch_process_id,date_batch_end,batch_status)
VALUES ("UPDATE_RATINGS",DATE,{success or failed})
```

## BA010.

**Description:** The system must delete all experiences where the add\_complete flag is equal to 0. These are experiences that were created by the add experience process, but never completed. A two day grace period has been added to deal with the situation where an experience add is started at 11:59pm (just before the date changes). All associated experience tables will be updated when an experience is deleted.

**Frequency:** Daily

**Parameters:** None

**Pseudocode:** INSERT INTO batch\_process\_master (batch\_process\_id,date\_batch\_start,batch\_status)  
VALUES ("INCOMPLETE\_EXPERIENCES",DATE,NULL)

```
SELECT add_subj_removal_grace GraceDays  
FROM system_parameters
```

```
// Create the following cursor  
SELECT experience_id, user_id  
FROM experiences  
WHERE date_submitted <= Today - :GraceDays  
AND add_completed = 0  
ORDER BY user_id
```

Seq\_number := 0

For each record in the cursor do the following

    // Delete from all associated tables

```
DELETE FROM experience_category WHERE experience_id = :exp_id  
DELETE FROM experience_views WHERE experience_id = :exp_id  
DELETE FROM experience_add_comments WHERE experience_id = :exp_id  
DELETE FROM experience_desc_words WHERE experience_id = :exp_id  
DELETE FROM experience_search WHERE experience_id = :exp_id  
DELETE FROM sponsor_pages WHERE experience_id = :exp_id  
DELETE FROM experience_search WHERE experience_id = :exp_id  
DELETE FROM experience_ratings WHERE experience_id = :exp_id  
DELETE FROM experience_views_summary WHERE experience_id = :exp_id
```

```
Report_Line := 'Experience # ' + :experience_id + ' submitted by ' + :user_id  
INSERT INTO batch_processing_detail  
    (BATCH_PROCESSING_ID,BATCH_DATE,SEQ_NBR,  
      BATCH_DETAIL_LINE)  
VALUES("INCOMPLETE_EXPERIENCES",DATE,seq_number,Report_Line)  
seq_number := seq_number + 1
```

End for loop

// Save process status to the batch\_process\_master table

```
INSERT INTO batch_process_master (batch_process_id,date_batch_end,batch_status)  
VALUES ("BAD_LINKS",DATE,{success or failed})
```

**BA011.**

*Description:* The system must email all ZCLs a link to their report page once a month

*Frequency:* Monthly

*Parameters:* None

*Pseudocode:*

## **BA012.**

**Description:** The system must mark all experiences for review/removal that have an average rating (the top 5 descriptive words) that is below a given threshold. The experience must be rated at least 10 times before it becomes subject to this rule.

**Frequency:** Monthly

**Parameters:** None

**Pseudocode:**

**BA013.**

**Description:** The system must mark all sponsored experience as paid once the results from the credit card submission is made.

**Frequency:** Monthly

**Parameters:** None

**Pseudocode:**

**BA014.**

*Description:* The system must delete entries from the temporary tables used to retain state in the application. The entries in the tables must be removed if they are more than 1 day old.

*Frequency:* Daily

*Parameters:* None

*Pseudocode:*

## BA015.

**Description:** The system must update the total\_score column in the correspondent\_waiting\_list table. This process must be performed and completed prior to running the batch routine that will select ACs.

**Frequency:** Daily

**Parameters:** None

**Pseudocode** INSERT INTO batch\_process\_master (batch\_process\_id,date\_batch\_start,batch\_status)  
VALUES ("UPDATE\_SCORES",DATE,NULL)

```
// Create the following cursor
SELECT cw1.user_id, su.application_score
FROM correspondent_waiting_list cw1 LEFT INNER JOIN system_users su ON
(cw1.user_id = su.user_id)

// Create the following cursor
SELECT sum(points)
FROM correspondent_audit
WHERE user_id = :user_id

Seq_number := 0;

For each record in the first cursor do the following
    Execute the second cursor using the user_id from the first and store the score
    UPDATE correspondent_waiting_list
    SET total_score = :application_score + cursor 2 result
    WHERE user_id = :user_id
    Report_Line := 'User ID ' + :user_id + ' application score ' + :app_score + '
                  submission_score ' + cursor 2 result + ' total score ' + (:app_score +
                  Cursor 2 result)
    INSERT INTO batch_processing_detail
    (BATCH_PROCESSING_ID,BATCH_DATE,SEQ_NBR,
    BATCH_DETAIL_LINE)
    VALUES("INCOMPLETE_EXPERIENCES",DATE,seq_number,Report_Line)
    seq_number := seq_number + 1
End for loop

// Save process status to the batch_process_master table
INSERT INTO batch_process_master (batch_process_id,date_batch_end,batch_status)
VALUES ("UPDATE_SCORES",DATE,{success or failed})
```

## **BA016.**

*Description:* The system must delete entries from the temporary tables used to retain state in the application. The entries in the tables must be removed if they are more than 1 day old.

*Frequency:* Daily

*Parameters:* None

*Pseudocode:*

## BA017.

**Description:** The system must count the number of times each descriptive word has been used in a given category. The count must then be stored in the frequently\_used\_words table. The count is how many times the word has been rated in the given category. The results must be aggregated by category code and word.

**Frequency:** Weekly

**Parameters:** None

**Pseudocode:**

```
// Clear out the summary table
DELETE FROM frequently_used_words

SELECT sum(rating_count) TOTAL_USES,
       Category_code,
       Descriptive_word
FROM   experience_desc_words
GROUP BY category_code, descriptive_word

// Insert each of the return rows from the above statement into table
       frequently_used_words

INSERT INTO frequently_used_words
       (primary_category-code, descriptive_word, used_count)
VALUES
       (:category_code, :descriptive_word, :TOTAL_USES)
```

**Number of Points Earned and Value****Functionality:**

This page will show a detailed view of the points that were earned and how they were earned.

The following variables will be passed into the servlet:

STARTDATE=start date for the detail query

If STARTDATE is not empty then

Add 1 month to date passed in and assign to ENDDATE

Get the audit start date for the given user:

```
SELECT audit_start_date
FROM system_users
WHERE site_id = :SITEID {session variable containing the current site id}
AND user_id=:USERID
```

If STARTDATE is "" or STARTDATE < audit\_start\_date then  
STARTDATE = audit\_start\_date

Perform the following to get the data necessary for display

// Use the session variable to get the name of the individual for display

// Get the points earned by the individual, the value of the actions, as well as the average values

```
SELECT sum(ca.points),
       aa.avg_monthly_points,
       aa.point_value,
       aa.action_group
FROM   contributor_audit ca LEFT OUTER JOIN accounting_actions aa ON
       (ca.site_id = aa.site_id
        AND ca.action_code = aa.action_code)
WHERE  site_id = :SITEID {session variable containing the current site id}
AND    ca.user_id = :USERID
AND    aa.user_type_code = :USERTYPECODE
If STARTDATE exists then
    AND ca.action_date_time >= :STARTDATE
If ENDDATE <> "" then
    AND ca.action_date_time <= :ENDDATE
GROUP BY aa.avg_monthly_points,
         aa.point_value,
         aa.action_group
ORDER BY action_group DESC
```

Display the data in the attached format, breaking when the action\_group changes. The action groups are as follows:

- 1 = Subjects
- 2 = Opinions

3 = Other  
4 = Awards

To get the points redeemed:

```
SELECT sum(ca.points),
       aa.avg_monthly_points,
       ac.action_code // this is necessary to create the link to the detail
       aa.action_description,
       aa.point_value,
       aa.action_group
FROM   contributor_audit ca LEFT OUTER JOIN accounting_actions aa ON
       (ca.site_id = aa.site_id
        AND ca.action_code = aa.action_code)
WHERE  site_id = :SITEID {session variable containing the current site id}
AND ca.user_id = :USERID
If STARTDATE exists then
    AND ca.action_date_time >= :STARTDATE
If ENDDATE <> "" then
    AND ca.action_date_time <= :ENDDATE
AND ca.action_code = "REDEMPTION"
GROUP BY aa.avg_monthly_points,
         aa.action_description,
         aa.point_value,
         aa.action_group
ORDER BY action_group DESC
```

To get the value of points:

```
SELECT sum(ca.points) TOTAL_EARNED_POINTS,
FROM   contributor_audit
WHERE  site_id = :SITEID {session variable containing the current site id}
AND ca.user_id = :USERID
If STARTDATE exists then
    AND ca.action_date_time >= :audit_start_date
AND ca.action_code <> "REDEMPTION"
```

```
SELECT sum(ca.points) TOTAL_REDEMPTIONS,
FROM   contributor_audit
WHERE  site_id = :SITEID {session variable containing the current site id}
AND ca.user_id = :USERID
If STARTDATE exists then
    AND ca.action_date_time >= :audit_start_date
AND ca.action_code = "REDEMPTION"
```

Total Points Available = TOTAL\_EARNED\_POINTS – TOTAL\_REDEMPTIONS

Get the pool information

```
SELECT available_pool_amount,
       Total_contribution
FROM   user_type_domain
WHERE  site_id = :SITEID {session variable containing the current site id}
AND user_type_code = :USERTYPECODE {session variable}
```

Value of points = (Total Points Available/Total\_contribution) \* pool\_amount

If the “go” button is pressed perform the following:

- Determine which radio button is active
- If “Since Inception” is clicked, recall this servlet passing in no start date
- If “Last Month” is clicked then recall this servlet passing in the first of the prior month as the date
- If “This Month” is clicked then recall this form passing in the first of the current month

If the user clicks on any line item under either the “Experiences” heading or the “Opinions” heading then perform the following

Link to SC9000 (subject activity detail) passing the following  
STARTDATE  
ENDDATE  
ACTIONCODE {the action\_code of the action they clicked on}

If the user clicks on any line item under either the “Extras” heading then perform the following

Link to SC9001 (other activity detail) passing the following  
STARTDATE  
ENDDATE  
ACTIONCODE {the action\_code of the action they clicked on}

## **Rate Subject**

### **Process Summary:**

This process will be used to rate a subject. Any registered user of the system can rate any subject in the database. The process of rating a subject earns the person rating the ability to view comments entered by other community members as well as earns points for the action. The individuals who entered the comments can also earn points.

### **Accessibility:**

Any registered user of the system can access the process.

User\_type\_code 1-7

The process will be accessed from the third page of the subject display.

### **Related Batch Processes:**

BA009:           The system must remove all ratings that are older than XX months.

## Rate a Subject (Step 1)

### Functionality:

This webpage is used to collect rating information on a subject. When the user arrives at this page it will be preloaded with the information on the subject they are about to rate. The ability to rate a subject can be initiated on the detail page of a subject. The subject id to rate would be passed in as a parameter in the request for the page.

SUBID = {the id of the subject to be rated}

Unset the session variable SUGGESTIMPROVEMETS if it exists. This would happen the first time the form is shown.

```
// Get the rating waiting period
SELECT nbr_days_between_ratings
FROM system_parameters
WHERE site_id = :SITEID {session variable containing the current site id}
```

```
// Check to make sure this person has not already rated this subject
SELECT count(*)
FROM rating_tracking
WHERE site_id = :SITEID {session variable containing the current site id}
AND user_id = :USER_ID
AND subject_id = :sub_id
AND date_rated >= Date - :nbr_days_between_ratings
```

If the count is > 0 then

DON'T LET THE USER RATE THIS SUBJECT, GENERATE A MESSAGE SAYING THE SUBJECT WAS ALREADY RATED BY THIS USER. Go back().

### Section 1:

NO radio buttons should be selected.

The age combobox would be populated by the following SQL statement

```
SELECT age_code, age_description
FROM age_breakdown_domain
WHERE site_id = :SITEID {session variable containing the current site id}
```

The 'gender' combobox would contain ('Male = M', 'Female = F')

Using the id of the individual on the page (cookie), determine if they are in the database, if so select the email, age\_code, gender, and user\_type\_code and prepopulate the above comboboxes with their information.

### Section 2:

The subject information would be prepopulated using the data in the subject table. The following SQL statement would be used:

// Select the number of views this section is worth and append to the title of the section

```
SELECT nbr_views_per_improvement
FROM system_parameters
```

```

WHERE site_id = :SITEID {session variable containing the current site id}

// Update the title of the section.

SELECT subject_desc, Subject_essence, special_instructions, offered_by, city,
       State,zip,country,avg_cost_from,avg_cost_to,min_time_required,max_time_required,
       Family_oriented,available_anytime,available_jan,available_feb,available_mar,
       Available_apr, available_may, available_jun, available_jul,available_aug,
       Available_sep,available_oct, available_sep,available_oct, available_nov,
       Available_dec, date_subject_start, date_subject_end, cost_comment,
       Time_comment, availability_comment, family_comment
FROM subjects
WHERE site_id = :SITEID {session variable containing the current site id}
AND subject_id = :sub_id {passed in}

// Display estimated cost
if avg_cost_from is null or avg_cost_from = '' then
    AvgCostVar := '' + '(' + cost_comment + ')'
Else
    AvgCostVar := '$' + avg_cost_from + ' to ' + avg_cost_to + '(' + cost_comment + ')'

// Display time for subject (Remember time is stored in minutes in the DB)
if min_time_required is null or min_time_required = '' then
    TimeVar = ''
Else
    If min_time_required > 302400 then
        MinTimeVar := Trunc(min_time_required/302400) + 'month(s)'
    Else if min_time_required > 10080 then
        MinTimeVar := Trunc(min_time_required/10080) + 'week(s)'
    Else if min_time_required > 1440 then
        MinTimeVar := Trunc(min_time_required/1440) + 'day(s)'
    Else if min_time_required > 60 then
        MinTimeVar := Trunc(min_time_required/60) + 'hour(s)'
    Else
        MinTimeVar := min_time_required + 'minute(s)'

    If max_time_required > 302400 then
        MaxTimeVar := Trunc(max_time_required/302400) + 'month(s)'
    Else if max_time_required > 10080 then
        MaxTimeVar := Trunc(max_time_required/10080) + 'week(s)'
    Else if max_time_required > 1440 then
        MaxTimeVar := Trunc(max_time_required/1440) + 'day(s)'
    Else if max_time_required > 60 then
        MaxTimeVar := Trunc(max_time_required/60) + 'day(s)'
    Else
        MaxTimeVar := max_time_required + 'hour(s)'

    TimeVar := MinTimeVar + ' to ' + MaxTimeVar + '(' + time_comment + ')'

If family_oriented = 'Y' then
    FamilyVar = 'Yes' + '(' + family_comment + ')'
Else if family_oriented = 'N' then
    FamilyVar = 'No' + '(' + family_comment + ')'
Else if family_oriented = 'S'

```

FamilyVar = 'Somewhat' + '(' + family\_comment + ')

There will be a link at the bottom of this section that will allow the person commenting on the subject to send an email to the author of the subject.

If the user clicks on this link, we need to check that a session variable SUGGESTIMPROVEMETS does not exist or contain a value. The click would link them to the email screen, already populated with information. If the session variable already exists then do not let them use this option again.

#### Section 3:

This section will contain all of the descriptive words that have been picked for this particular subject. The words will be displayed with 5 radio buttons next to each word so that the reviewer can rate the importance of the words.

NO radio buttons should be selected.

The following SQL statement can be used to get the words:

```
SELECT descriptive_word
FROM subject_desc_words
WHERE site_id = :SITEID {session variable containing the current site id}
AND subject_id = :current subject ID
ORDER BY descriptive_word
```

If the user clicks on the 'Review and rate more words' the go to step 4 passing in the SID

#### Section 4:

This section is not prepopulated.

#### Section 5:

This section is not prepopulated

#### Database Tables Used:

SUBJECTS  
SUBJECT\_DESC\_WORDS

#### Screen/Email/Report Prototype:

SC800

#### Validations

Verify that a selection has been made for each of the items in section 1.

Verify that at least 1 word in step 3 has been rated.

Require all fields in step 1.

Require both Headline and Comment with or the other has data.

## Rate a Subject (Step 2)

### Functionality:

This process will save the rating information to the database and will update the rating values on the subject in realtime.

```
// Get the rating waiting period
SELECT nbr_days_between_ratings
FROM system_parameters
WHERE site_id = :SITEID {session variable containing the current site id}

// Check to make sure this person has not already rated this subject
SELECT count(*)
FROM rating_tracking
WHERE site_id = :SITEID {session variable containing the current site id}
AND user_id = :USER_ID
AND subject_id = :sub_id
AND date_rated >= Date - :nbr_days_between_ratings

If the count is > 0 then
    DON'T LET THE USER RATE THIS SUBJECT, GENERATE A MESSAGE SAYING THE
    SUBJECT WAS ALREADY RATED BY THIS USER. Go back().

// Send comment and headline through bad word filter
ERROR BACK IF BAD WORD FOUND

// Create a variable to hold the number of views earned
NUM_VIEWS_EARNED := 0;

// Determine weighting multiplier
WEIGHTING_MULTIPLIER := 0;

SELECT rating_multiplier
FROM user_type_domain
WHERE site_id = :SITEID {session variable containing the current site id}
AND user_type_code = :USERTYPECODE

WEIGHTING_MULTIPLIER := WEIGHTING_MULTIPLIER + :rating_multiplier;

SELECT opinion_multiplier_subject,
       opinion_multiplier_no_experience,
       opinion_multiplier_very_qualified,
       opinion_multiplier_somewhat_qualified,
       opinion_multiplier_slightly_qualified
FROM system_parameters
WHERE site_id = :SITEID {session variable containing the current site id}

If personal experience yes radio button is checked then
    WEIGHTING_MULTIPLIER := WEIGHTING_MULTIPLIER + :rating_multiplier_experience
Else If personal experience no radio button is checked then
    WEIGHTING_MULTIPLIER := WEIGHTING_MULTIPLIER + :rating_multiplier_no_experience;
If qualification very button is checked then
    WEIGHTING_MULTIPLIER := WEIGHTING_MULTIPLIER + :rating_multiplier_very_qualified
```

```

Else If qualification somewhat button is checked then
    WEIGHTING_MULTIPLIER := WEIGHTING_MULTIPLIER + :rating_multiplier_somewhat_qualified
Else If qualification slightly button is checked then
    WEIGHTING_MULTIPLIER := WEIGHTING_MULTIPLIER + :rating_multiplier_slightly_qualified

```

// Step 2 on webpage

Check the session variable to determine if the user sent an email suggestion to the correspondent for changes to step 2. This is an on your honor system, we assume that because they clicked on the link they did sent the email. If the session variable indicates that the process was initiated, then perform the following:

```

SELECT point_value, dollar_value, view_value
FROM accounting_actions
WHERE site_id = :SITEID {session variable containing the current site id}
AND user_type_code = :USER_ROLE
AND action_code = 'RATING_IMP'

NUM_VIEWS_EARNED := NUM_VIEWS_EARNED + :view_value

INSERT INTO correspondent_audit
    (site_id, user_id, action_date, action_code, points, posted_by, refrence,dollar_value)
VALUES (:SITEID, :USER_ID, date(), 'RATING_IMP', :point_value, 'SYS', :exp_id,
:dollar_value)

```

//Step 3 on webpage

Next save the new ratings for the words

// If a word has been rated then

// For each word that is rated in the list, perform the following

```

INSERT INTO subject_ratings
    (site_id, subject_id, rating_type, rating_score, rating_date, descriptive_word,
    rating_weight)
VALUES
    (:SITEID, :sub_id, 'D', {score 1-5}, Date(), :descriptive_word,
    WEIGHTING_MULTIPLIER)
// Recalculate and store the new aggregate rating
SELECT SUM(RATING_SCORE *RATING_WEIGHT)/SUM(RATING_WEIGHT)
    average_rating,

## Rate a Subject (Step 4)

### Functionality:

This webpage will display all the other word for the main category this subject belongs to.

The webpage will be presented just like Step 3 on SC800. Use the following SQL to get the words:

```
SELECT descriptive_word
FROM subject_desc_words_domain
WHERE site_id = :SITEID {session variable containing the current site id}
AND category_code = :subject primary cat code
AND descriptive_word NOT IN
    (SELECT DISTINCT descriptive_word
     FROM subject_desc_words
     WHERE site_id = :SITEID {session variable containing the current site id}
     AND subject_id = :sub_id)
ORDER BY descriptive_word
```

If a value exists in the session variable ADDED RATING WORDS then the user is revisiting the screen, get the ratings that were performed before.

```
SELECT tag, descriptive_word, rating_score
FROM rating_state
WHERE site_id = :SITEID {session variable containing the current site id}
AND tag =: ADDED RATING WORDS
```

// Place the values from the second query where necessary.

The user would then rate the words they want to add.

## **Rate a Subject (Step 5)**

### **Functionality:**

This process will save the selected words and their ratings to a state table to be accessed by the main rating process. The user will then be placed back to the original screen where they can continue the rating process.

Set a session variable to indicate that this process has taken place

```
Set ADDEDATINGWORDS = :USERID+Date+Time
```

// For all words that have been rated, perform the following

```
INSERT INTO rating_state
(site_id,tag, descriptive_word, rating_score)
VALUES (:SITEID, : ADDEDATINGWORDS, :descriptive word, rating score {1..5})
```

## **Rate Experience**

### **Process Summary:**

This process will be used to rate an experience. Any registered user of the system can rate any experience in the database. The process of rating an experience earns the person rating the ability to view comments entered by other community members as well as earns points for the action. The individuals who entered the comments can also earn points.

### **Accessibility:**

Any registered user of the system can access the process.

AC  
ZCL  
CC  
VC  
CAL  
GUEST

The process will be accessed from the third page of the experience.

### **Related Batch Processes:**

BA009:           The system must remove all ratings that are older than XX months.

## **Comment Display**

### **Process Summary:**

This process will be used to view comments made about subjects. The viewing of a comment by an individual results in points being awarded to the person who made the comment. The person doing the viewing will receive a deduction of 1 view from their view account. Correspondents and Sponsors have unlimited views, users with a status of guest have a limited amount of views. There are grace views that can be used if a user runs out of views. Grace views are assigned at the beginning of a new session and can not be replenished during a session.

### **Accessibility:**

Roles {1,2,3,4,5,6,7}

The page will be accessed from the 3<sup>rd</sup> page of the experience, by clicking on a comment headline, or from the journal page when viewing lives touched.

### **Related Batch Processes:**

N/A

## Comment Display Page (Step 1)

### Functionality:

Selecting one of comment headlines from the third page subject view will bring the user to this webpage, with the comment prepopulated in the top section of the page. A parameter is passed to the page containing the ID of the subject to which the comment is attached (SUBID), as well as the comment\_ID of the comment to view(COMMID). Another parameter will be passed when calling this page from the Journal section of the website. The parameter will be ONEEXP and will be set to "T" when called from the journal page. If this parameter is present, do NOT display the scrolling list of other comments at the bottom of this screen.

The first step is to verify that the user has comment views available. Perform the following process if the currently logged in user has a user\_type\_code of 6 (GUEST). All other roles will bypass this process.

```
Available_Views := CURRENTVIEWCOUNT {session variable}
```

```
If Available_Views <= 0 then
```

```
    Show an error message indicating that all comment views have been used up, etc.
```

```
CURRENTVIEWCOUNT = CURRENTVIEWCOUNT - 1
```

```
UPDATE system_users
```

```
SET comment_views_remaining = comment_views_remaining - 1
```

```
WHERE site_id = :SITEID {session variable containing the current site id}
```

```
AND user_id = :USERID {Current users ID}
```

If an error was not encountered then continue with the following logic.

The next step is to award any points, cash or views for the activity of viewing a comment to the author of the comment. (as long as the author of the comment is not the same as the person viewing the comment)

```
SELECT point_value, dollar_value, view_value
```

```
FROM accounting_actions
```

```
WHERE site_id = :SITEID {session variable containing the current site id}
```

```
AND action_code = "VIEWED_COMMENT"
```

```
AND user_type_code = (SELECT su.user_type_code
```

```
FROM subject_comments sc JOIN system_users su ON
```

```
(sc.user_id = su.user_id)
```

```
WHERE site_id = :SITEID {the current site id}
```

```
AND comment_id = :COMMID)
```

```
If view_value > 0 then
```

```
CURRENTVIEWCOUNT := CURRENTVIEWCOUNT + view_value
```

```
UPDATE system_users
```

```
SET Comment_views_remaining = Comment_views_remaining + :view_value
```

```
WHERE site_id = :SITEID {session variable containing the current site id}
```

```
AND user_id = {user ID from comment}
```

```
If accounting_actions.point_value > 0 or accounting_actions.dollar_value > 0 then
```

```
INSERT INTO contributor_audit
```

```

        (site_id,user_id, action_date_time, action_code, points, posted_by
        reference, dollar_value, subject_id)
VALUES (:SITEID,{user id on the comment record}, Date(),
        "VIEWED_COMMENT", :point_value,
        "SYS", {20 characters of headline}, :dollar_value)

```

//Update the count of the times the comment was viewed. (as long as the author of the comment is not the same as the person viewing the comment)

```

UPDATE subject_comments
SET times_viewed = times_viewed + 1
WHERE site_id = :SITEID {session variable containing the current site id}
AND comment_id = :COMMID

```

The top section of this page will contain the basic subject information as it appears on the second page search results. (To anchor the sponsor to the experience that is being worked on)  
The following SQL can be used:

```

SELECT primary_category_desc,
       Subject_desc,
       Subject_essence,
       City,
       State,
       Postal_code,
       Country_desc,
       Organization
FROM   subjects
WHERE  site_id = :SITEID {session variable containing the current site id}
AND    subject_id = :SUBID

```

Get the comment information from the subject\_comments table using the following:

```

SELECT sc.user_id,
       sc.Headline,
       sc.Comments,
       sc.comment_date,
       sc.experience_level,
       abd.age_desc,
       sc.gender,
       sc.direct_experience,
       sc.times_agreed,
       sc.user_type_desc
FROM   subject_comments sc LEFT OUTER JOIN age_breakdown_domain abd ON
       (sc.site_id = abd.site_id
        AND sc.age_code = abd.age_code)
WHERE  site_id = :SITEID {session variable containing the current site id}
AND    comment_id = :COMMID

```

Place the data from the above query in the comment display fields, the fields are not editable to the user.

The only field in this section that can be accessed is the First Hand checkbox. The field will default to unchecked

If ONEEXP <> "T" then

The second frame will be populated by the following SQL:

```
SELECT comment_id, comment_date, headline
FROM subject_comments
WHERE site_id = :SITEID {session variable containing the current site id}
AND subject_id = :SUBID
ORDER BY comment_date DESC
```

Else

Create a "Back" button at the bottom of the screen rather than the list of comments

The headline will be a hyperlink that will re-request the page in the above frame.

If the 'I agree' checkbox is checked, perform the following:

- Disable the checkbox, leave it checked.
- Call a servlet to perform the following SQL

```
UPDATE subject_comments
SET times_agreed = times_agreed + 1
WHERE site_id = :SITEID {session variable containing the current site id}
AND subject_id = :SUBID
AND comment_id = :COMMID
```

## Number of Subjects Added

### Functionality:

This webpage will display the subjects that were added by the given individual. The primary category would be passed into this page to limit the entries displayed. The top of the page will contain all of the level 1 categories and the counts of subjects in the given category that were nominated by the user and accepted. Clicking on one of these will refresh the page showing the entries for the given category code. The servlet can receive the following parameters:

**FILTER** {This will equal one of the following:

1=zip  
2=city  
3=state  
4=country  
(or blank) }

**CATEGORY** {This will equal the category code selected}

The following SQL would be used to populate the 'Set Location to View' combobox.

```
SELECT su.user_postal_code,
       Pi.update_city_1,
       Pi.update_state_1,
       Pi.update_country_1,
       Pi.update_country_desc_1
FROM   system_users su LEFT OUTER JOIN personalization_info pi ON
       (su.site_id = pi.site_id
        AND su.user_id = pi.user_id)
WHERE  site_id = :SITEID {session variable holding current site id}
AND    user_id = USER_ID {session variable}
```

// Populate the combobox with the following values, descriptions

```
:user_postal_code, 'Your Postal Code'
:update_city_1, 'Your City'
:update_state_1, 'Your State'
:update_country_1, 'Your Country'
'ALL', 'All Locations'
```

Select the primary categories and the counts

```
SELECT COUNT(*), s.primary_category_code, s.primary_category_desc
FROM   s.subjects
WHERE  site_id = :SITEID {session variable holding current site id}
AND    s.user_id = :USERID {current user id}
// If CATEGORY <> "" then
    AND primary_category_code like {first 2 characters of the cat code passed in}%
// If FILTER = 1
    AND s.postal_code = :user_postal_code
// Else If FILTER = 2
    AND (city = :update_city_1
         OR nearest_city_1 = :update_city_1
         OR nearest_city_2 = :update_city_1
         OR nearest_city_3 = :update_city_1)
```

```

        OR nearest_city_4 = :update_city_1
        OR nearest_city_5 = :update_city_1)
// Else If FILTER = 3
    AND state = :update_state_1
// Else If FILTER = 4
    AND country_code = :update_country_1
// End if
    AND s.visible = 1
GROUP BY primary_category_desc, primary_category_desc
ORDER BY primary_category_code ASC

```

Display the category descriptions with the count in () and make the entries a link back to this page specifying the category\_code as a parameter CATCODE. NOTE: If the All Categories link is pressed then pass in "ALL" for the CATCODE variable. Also pass in the current FILTER if available.

If any parameters we passed in through the qrystring, use those for the select statement rather than the default behavior specified below.

If no code is passed in through the CATCODE variable then do not display the section below.

```

SELECT DISTINCT s.subject_id,
    s.primary_category_desc,
    s.Subject_desc,
    s.Subject_essence,
    s.City,
    s.State,
    s.Postal_code,
    s.Min_time_req,
    s.Max_time_req,
    s.Time_units,
    s.Avg_cost_from,
    s.Avg_cost_to,
    s.Available_anytime,
    s.Available_jan,
    s.Available_feb,
    s.Available_mar,
    s.Available_apr,
    s.Available_may,

```

For each record located in the search, display per the attached format. If the value sponsored\_amt > 0 then display gif to indicate the subject is sponsored.

Clicking on the count of views (which is a link) will bring up SC6000 passing LOC=2.

Clicking on the number of comments (which is a link) will bring up SC6001.

Clicking on the subject link would display the detail page for that subject.
